Upper Sackville.

—Miss Lillie Tuttle of Upper Cape is visiting Miss Jennie Fawcett. —Miss Bessie Wheaton is visiting friends in Port Elgin. —Miss Lulu Blanch returned home on Monday.

—Master Eddie McDougall of Newfoundland, who has been attending the Sackville academy, is spending his vacation at Mr. Chas. George's.

—Miss Mabel Thompson went to Springhill on Tuesday to take part in a concert at that place. She was accompanied by her sister Sadie.

—Mr. Morton of Hampton, Kings Co., has been engaged to teach the Central school for the coming term; and Miss Thos. Tingley of Point Beate, and Miss Gause Anderson to teach the advanced primary and primary departments, respectively at Middle Sackville.

—We understand that Messrs. Geo. Tones and Wesley Wharton have purchased a hay press from T. A. Tingley of Dorchester. They intend pressing 1000 tons this season.

The Semi-annual examination of the school in Sackville, N. S., taught by Miss Eliza Dobson was held on the afternoon of the 19th inst. The trustees with a large number of visitors and parents were present. Though very much crowded for visitors, the superior attendance of 57 it is truly remarkable what a state of excellence this school is in. After three years of great success Miss D. finds it necessary to rest for a term. The scholars presented their teacher with a well worded address accompanied by a very handsome flower stand. Mr. G. Campbell then treated the scholars to an abundance of Xmas candies after which the school sang God Save the Queen in a very pleasing manner. The next afternoon found a goodly number of visitors to witness the examination of the advanced dept taught by Mr. Geo. A. Wathan who has had this school in charge for the last six years; and it is needless to say the scholars showed superior training. Mr. W. by his manly straight forward course has made many friends who feel it a loss to lose him; but he has been offered and accepted the superior school of Doaktown, Northumberland Co. At the close Miss Minnie Tingley read an admirable address expressing the scholars good wishes for their teacher and as a token of their regard presented Mrs. W. with a china cup and saucer and their teacher with a handsomely finished easy chair.

This district has two more schools at Upper Sackville. They held their examinations the following day. Miss Jennie Sommerville who has taught the primary department for two years has brought her school to a good understanding of their work. With a good grasp of nuts and candies and the national anthem being sung the children went to their homes; while the large number of visitors with the trustees went into the advanced department to hear Mr. F. A. Dixon the popular teacher of the superior school examine his pupils which he did in the branches required for first class teachers; and the most of them showed great proficiency. It seems a pity that the trustees do not have money enough to keep good teachers of their own.

—Mr. E. P. Carey, D. A., Mr. Allison, B. A., and graduate of Harvard University, has been offered and accepted the position of Principal of the High School of Science in Manouineu Michigan.

A great deal of complaint is heard from people about the hurry the Section men of the N. B. and P. E. I. R. were in this fall to take the planks out over the crossings. For more than four weeks it has been almost impossible to haul loads over many of them especially where the main road and the rail road run parallel like the case in Middle Sackville. At this crossing it is very hard to get over with loaded teams. When there is reason for taking them out people say not a word but such has not been the case this fall.
