Fishing Tackle.

Trout Rods, Reels, Lines, Flies, Baskets, Landing Nets, etc. Now is the time to buy a Shad or Salmon Net.

Tweeddale & Co.

Cash Hardware Store.

PROBLEM FOR SOLUTION.

Montreal Strikers Still Hold Out and Congestion of Freight Growing.

It Will Take Thousands of Men a Month to Catch Up the Time Lost.

SYMPATHY OF BRITISH UNIONISTS.

MONTREAL, May 7.—Everything is quiet along the harbor front this morning. The work of discharging various cargoes is proceeding slowly and the strikers are good naturedly waiting around or discussing the situation in small groups. J. G. O'Neill, Vice President of the International Dock Laborers Union, who has been conducting this strike, has gone to Ottawa at the request of Sir Wilfrid Laurier. The local union has received advices from the longshoremen's union at Liverpool that the union men there will not unload any ship arriving from Canada during the progress of the strike which has not been loaded by

union men. Thus within a few days trouble will extend to the British ports. The local union has received a remittance from the International Union, being the first installment of strike pay. There is such an accumulation of work in the port of Montreal that shipping men say it will take 5,000 men at least a month to catch up with the work, even should the strike be settled within a week. Mayor Cochrane and Alderman Lapointe, who have been taking a special interest in trying to bring the longshoremen's strike to an end, profess to be hopeful that it will be ended tonight, when Mr. O'Neill, the leader of the strikers, gets back from Ottawa.

TORONTO TEAMSTERS STRIKE.

Railway Teamsters Have Been Practically Granted Demands

And the Promised Tie-Up Will Not Occur.

The Companies Compelled to Come to the Terms of Union Men.

TORONTO, May 7.—There will be no strike of railway teamsters, at least not for the present. At the last moment, an offer has been submitted to the men, conceding practically all their demands. This offer was before the men at a very large special meeting of the union held last night and was tentatively accepted. The matter has moved. A condition of "implied" has strict secrecy.

THE WANDERING DOUKHOBORS.

Some Trouble Experienced in Getting Them Back to Farms.

The Leader of the Fanatics Greatly Blamed

By the Better Thinking Classes of the Doukhobor Community.

WESTERN, N. W. T., May 7.—Reports from the mounted police engaged in escorting the wandering Doukhobors to their homes again, show they are encountering difficulties. The number of fanatics is reduced to about sixty, mostly women, and these refuse to settle down on farms. A band has succeeded in passing St. Katherine River en route south. Local members of the Doukhobor General Council met to discuss means of punishing the leader of the pilgrim age, Seraphim. It was decided to wait the arrival of Peter Voregin, the Doukhobor leader, when a mass meeting of the people will be held to decide the best method of dealing with the pilgrim, against whose acts there is a strong feeling in the communities.

A HALFBREED'S SUICIDE.

Probably Thought He Had Killed His Wife.

WINNIPEG, May 7.—Reports of a case of attempted murder, followed by suicide, have just reached Edmonton by travellers from the north. A half-breed, named Pierre Delome, quarrelled with his wife for refusing to accompany him north on a freighter. Delome seized the woman, stabbed her in the head and shoulder, and then attempted to cut her throat. She dropped insensible and the man fled. A silk handkerchief, which the woman had around her throat, saved her life. On the following day Delome's body was found lying by the roadside, his throat having been cut. The wife is recovering.

IN MOROCCO.

MELILLA, Morocco, May 7.—The rebels have defeated the Imperial forces after an hour's fight near Fez, and have captured the positions held by the Sultan's troops, all their tents and much loot. Both sides lost heavily. The rebels sent messengers to the Pretender asking for reinforcements, as they were unable to withstand a further attack. The reinforcements, however, were not sent.

When washing greasy dishes or pots and pans, Lever's Dry Soap (a powder) will remove the grease with the greatest ease.

G. T. R. TRANS-CONTINENTAL.

The Subject Came Up Before the Railway Committee

And Was Discussed at Length This Morning.

Sir Rivers Wilson Says Portland Will Not Be the Winter Port.

OTTAWA, May 7.—Early this morning the railway magnates began to gather around the Parliament buildings. Sir Charles Rivers Wilson, Messrs. Hays, Morse and Wainwright of the Grand Trunk, and their counsel, were early on hand. Messrs. MacKenzie and Mann, Charles Drinkwater, of the C. P. R., and others were present. Across the whole route of the proposed line, the Pacific line from Quebec to North Bay, then to the north to Winnipeg, thence through Peace River Pass to Port Simpson. It also shows a branch from Edmonton through Yellow Head Pass to Butte Lake.

Immediately the bill was called, Dr. Sproule represented that the map did not comply with the rules, as it did not show the other railways through the district. After an hour's discussion on this point, Mr. Hyman finally ruled the map practically in order. Mr. McCarthy, who introduced the bill, desired the fullest consideration. He claimed that the line from Quebec to Port Simpson, connecting at Quebec with the E. C. R., formed a valuable all Canadian line from ocean to ocean. He proposed to ask an amendment by providing that instead of going via North Bay the line be carried almost in an air line from Quebec to the highest point east of Lake Nepigon and passing about 40 miles south of Lake Abitibi. That line would develop the undeveloped part of Quebec and northern Ontario.

Sir Rivers Wilson addressed the committee at some length, detailing the position of the G. T. R. and their claims for assistance in this vast project.

In reply to Mr. Ganong, he stated that Quebec would be the summer port and Portland would certainly not be the winter port. In answer to Mr. Tarte, Mr. Hays stated that the G. T. R. would start the construction of the road between North Bay and Quebec immediately on the completion of survey, that the work on the line between Winnipeg and Quebec, which would of course be built first, would be begun simultaneously at a dozen points, whenever the necessities were greatest, and the whole line would be rushed to completion.

In answer to Mr. Fowler Mr. Hays said, the G. T. R. are looking towards St. John as a port, but he could say no more. The G. T. R. was considering building into the Maritime Provinces, but he was not prepared to lay plans before the committee.

The preamble was not carried at one o'clock and the Committee adjourned sine die.

Fear of the Future

Most people who dread the future are victims of some terrible disease. Mrs. W. Francis, 304 Colborne St., Kingston, was in a bad state with kidney disease. She had severe pains in back and legs, was gradually losing flesh and felt a dread of the future. A friend recommended Dr. Chase's Kidney-Liver Pills and the result was a complete cure. There is no medicine more reliable, none so certain to produce a thorough cure. One pill a dose, 25 cents a box.

Postoffices were first established in 1464.

The first lucifer match was made in 1829.

Kerosene was first used for lighting in 1826.
