The Tale of Perfect Time in a Watch

From Mainspring to Hairspring, between them lies the secret. The Mainspring is the power which it transmits to the control and regulates the motion. The Hairspring is most delicate; imagine a 100th part of a hair. (Impossible isn't it?) Yes, it is enough to interfere in its performance, so wonderful is the adjustment. The friction from accumulating dirt; lack of oil, etc., destroy these perfect fittings. Do not let your watch run to ruin from neglect. Remember one business is the care of watches, and one opinion: cost is nothing.
