

AN UP-TO-DATE STOVE

Do you realize there is no longer any reason why you should use a coal range? Oil is cheaper than coal; it is lighter and easier to handle, and gives an intense heat. Provided you have the right stove, oil is more economical, cleaner and less trouble. Have you seen the

New Perfection Oil Cook-stove

The accompanying illustration gives you only a rough idea of its appearance. You really can't appreciate it until you either use it yourself, or talk to someone who has used it. It does everything that a coal range will do—except heat the room. The New Perfection Oil Cook-stove will do anything, from heating a kettle of water to cooking a course dinner, but it won't heat a room. It doesn't "smell," it doesn't smoke. It can't get out of order. Light it and it is ready. Turn it down and it is out. Only a woman who knows the trouble of carrying coal and cooking in a hot kitchen can appreciate what it means to have a clean, perfect stove that will cook anything, boil, bake or roast, and yet won't heat the kitchen. How is it done? The flame is controlled in turquoise-blue enamel chimneys, and directed against the bottom of pot, pan, kettle or oven, and only there. The flame operates exactly where it is needed—and nowhere else. With this stove your kitchen is cool.

Caution Note: Be sure you get this stove—the one with the name-plate reads "New Perfection."

On Friday evening the program was splendid, the particular feature of the evening was an operetta "All Baba," a burlesque extravaganza, which was very amusing and therefore very entertaining. "A Pair of Linatics" a humorous selection provoked much mirth. The drills were particularly pretty and graceful, the musical selections were exceedingly well rendered. The pupils and staff of St. Mary's school are to be congratulated on the success of their entertainments. There was not an inferior number on the program of either evenings and it would be impossible to dwell on the merits of each selection. But the literary as well as the musical numbers were of a superior quality and were exceedingly well rendered.

Empire Day was celebrated appropriately and with enthusiasm at all of the public schools of the city. Entertainments and programs of songs and speeches were given in every case. The following clergymen addressed the schools:

Cruikshank made a few remarks on the patriotic duty of every resident of the Dominion and very briefly reviewed some of the greatest deeds in the history of the empire. He said that a country should get so much respect over the quantity of grain it raised or the amount of coal its mines produce or the miles of railway it owns as over the virtue and character of its people. He referred to the history of Greece and Rome.

Mrs. Spence, president of the Daughters of the Empire, also gave a brief but interesting address on the life of Nelson, dealing particularly on his sterling worth and many character traits. Mrs. Pinkham and Dr. Scott also addressed the meeting. The pupils led by Miss Comben the supervisor of music of the city schools sang very heartily: "The Maple Leaf," "O Canada" and "Rule Britannia."

THIS DOG USES THE TELEPHONE

Locked in Office, Canine Calls Calmly and is Released

London, May 27.—This is the latest dog story in Europe and the most skeptical Britons are swallowing it. The operator at Gramsby telephone exchange received an unexpected call from the premises of J. M. Turney, Limited, a local firm of wholesale tobacconists, in the early hours of Sunday morning.

Putting the instrument to his ear, his surprise developed into wonderment, for all he could get in reply to the usual query, "What number please?" was the barking of a dog.

Coming to the conclusion that there were burglars in the place, the operator informed the police, the consequence, the owner of the dog, suddenly remembering that he had left the animal, a fox terrier, in the office, had gone to the premises to release it. When he arrived he found a couple of police officers about to leave an entrance. Their astonishment was great that the terrier had knocked the desk five feet high and landed on a receiver of the telephone. Fledgling hearing his master's voice over the instrument, it had apparently barked into the mouthpiece to draw attention to its plight.
