

"THE ART OF THE PHOTOPLAY" is a condensed textbook of the technical knowledge necessary for the preparation and sale of motion picture scenarios. More than 35,000 photoplays are produced annually in the United States. The work of staff-writers is insufficient. Free-lance writers have greater opportunities than ever before, for the producing companies can not secure enough good comedies and dramas for their needs. The first edition of this book met with unusual success. Its author, now the Director General of Productions for the Beaux Arts Film Corporation, is the highest paid scenario writer in the world, as well as being a successful producing manager. Among his successes were the scenarios for the spectacular productions: "Robin Hood," "The Squaw Man," "The Banker's Daughter," "The Fire King," "Checkers," "The Curse of Cocaine" and "The Kentucky Derby."
