PROTECTING ROOFS FROM FIRE. - A wash, BEE HIVES FOR THE MILLION, composed of lime, salt and fine sand with wood ashes, put on in the ordinary way of, whitewashing, is said to render the roof fifty ; fold more safe against taking fire from falling cinders, or otherwise, in case of fire in the vicinity. It pays the expense a hundred fold in its preserving influence against the effect of the weather; the older and merc weather-beaten the shingles, the more benefit derived. Such shingles are generally more or less warped, rough and cracked. The application of the wash, by wetting the upper surface, restores them to the original or first va-4 2: form, thereby closing the spaces between the shingles, and the lime and sand, by filling up the cracks and pores in the shingle itself, prevents its warping for years, if not forever .- Fireman's Journal

If screws are warmed and dipped in melted tallow it will prevent their rusting, and they can always be unserewed with ease. A large quantity of screws can be greased in a few minutes, and the operation is one which will ultimately result in a great saving of time and labour

A grand substitute for barn-yard manure.

PATRONIZED by the President of the Board of Agri-

PATRONIZED by the President of the Board of Agriculture and Arts Association, Ontario.

Its liberal use in early spring is almost a sure preven two of impury from dry seasons,
Will produce a good crop of wheat from lands that have become exhausted. As a top dressing for fall wheat after a severe winter it is invaluable.

Will probably double the hay crop if judiciously applied.
Will greatly increase the yield of Indian corn, which is one of the most profitable crops that can be grown.

Will almost double the potato crop if used in sufficient quantity, with proper cultivation, and may prevent rot.

Will suit any kind of land that needs manuring, and any kind of crop, as it contains most of the elements necessary for their growth.

Will take about 300 lbs, per acre for an ordinary crop, and will not cost much more per acre than the cost of hauling and spreading barn yard manure at a busy sea son of the year.

Manufactured at the Brockville Chemical and Super-Phosphate Works, Brockville, Ont., and will be delivered at any point on railroad in Canada.

Price in barrels, if ordered at Brockville, \$50 per ton.

Price in barrels, if ordered at Brockville, \$50 per ton. ALEXANDER COWAN,
