 HAMILTON ONT., CANADA. (20-13)

**BURDELL'S**  
  
**FOUR-POINTED GALVANIZED  
 STEEL BARB WIRE FENCING.**  
 There are now before the public a number of Four-  
 pointed Barbs which, to the casual observer, are similar in  
 appearance to the Burdell Barb which we are making, but a  
 close examination of them will show the difference and their  
 inferiority.  
 The Grand Trunk Railway Company of Canada give it a  
 preference over all others, and have contracted with us for  
 six hundred acres of fencing for immediate delivery.  
 This Barb was patented in the United States in 1877, and  
 is an improvement on any other patent, and we will defend  
 ourselves and our customers against the threats of pretended  
 monopolists. We claim superiority for our Barb Wire over  
 all others for the following reasons:  
 1st.—We use only the best quality of Galvanized Annealed  
 Steel Wire.  
 2nd.—The two strands of No. 12 Wire are twisted  
 together just enough to allow for the contraction and expansion  
 of the metal caused by heat and cold, and not so much  
 as to injure the structure of the steel.  
 3rd.—The Barbs on our Wire are four-pointed, thus  
 always presenting a Barb laterally or at a right angle, which  
 is a great advantage over the Two-Point Barbs, as cattle are  
 unable to get against the fence to break it or push it down.  
 4th.—The Barbs are fastened to the Wire at intervals of  
 12 inches, in a manner entirely different from any other, being  
 merely locked around and between both wires, so that they  
 cannot slip or move toward each other, and they also prevent  
 the untwisting of the cables should either wire get broken.  
 5th.—The machinery by which the Barbs are put on is so  
 perfect that the Cable Wires are not injured or weakened by  
 the process, as is the case with other Four-Pointed Barb  
 Wire.  
 Manufactured by the CANADA WIRE COMPANY,  
 Montreal. H. R. IVES, Manager.

ESTABLISHED 1836.  
**S. R. Warren & Son**
