calcarata, <i>Say.</i>	STRANGALIA, <i>Serr.</i>
tridentata, <i>Oliv.</i>	subhamata, <i>Rand.</i>
vestita, <i>Say.</i>	bicolor, <i>Sved.</i>
CYRTINUS, <i>Lac.</i>	quagga, <i>Germ.</i>
*pygmaeus, <i>Hald.</i>	fugax, <i>Fabr.</i>
OBEREA, <i>Meg.</i>	lugubris, <i>Say.</i>
amabilis, <i>Hald.</i>	lineola, <i>Say.</i>
tripunctata, <i>Fabr.</i>	*cruentata, <i>Hald.</i>
DESMOCERUS, <i>Serr.</i>	LEPTURA, <i>Linne.</i>
cyaneus, <i>Fabr.</i>	canadensis, <i>Oliv.</i>
RHAGIUM, <i>Fabr.</i>	biforis, <i>Newm.</i>
lineatum, <i>Oliv.</i>	vittata, <i>Oliv.</i>
TOXOTUS, <i>Serr.</i>	vagans, <i>Oliv.</i>
decoloratus, <i>Harr.</i>	sphaericollis, <i>Say.</i>
trivittatus, <i>Say.</i>	mutabilis, <i>Lac.</i>
*cylindricollis, <i>Say.</i>	pubera, <i>Say.</i>
*Schaumii, <i>Lac.</i>	8-notata, <i>Say.</i>
ENCYCLOPS, <i>Newm.</i>	scalaris, <i>Say.</i>
coeruleus, <i>Say.</i>	subargentata, <i>Kirby.</i>
EVODINUS, <i>Lac.</i>	*propinqua, <i>Bland.</i>
monticola, <i>Rand.</i>	proxima, <i>Say.</i>
ACMAEOPS, <i>Lac.</i>	capitata, <i>Newm.</i>
proteus, <i>Kirby.</i>	ruficollis, <i>Say.</i>

THE NUMBER OF INSECTS.—The number of described species of insects is estimated by Gerstaecker at above one hundred and sixty thousand, viz.: Coleoptera, ninety thousand; Hymenoptera, twenty-five thousand; Diptera, twenty-four thousand; Lepidoptera, twenty-two to twenty-four thousand.—*Nature.*

CLASSIFICATION OF MOTHS.—The great work by the Messrs. Felder on the Lepidoptera of the Novara (an Austrian) Exploring Expedition, will be completed this year. It will contain a complete classification of the moths, and will supplement Guenee's work on them.—*American Naturalist.*
