

The President then formed the different committees for examination.

The following gentlemen, after satisfactory examination, received their licences—Messrs. Francis Hubert Larue, H. N. Casavant, Gedeon La Roche, and Francis X. Côté.

Messrs. John Burke and George Alexander Davidson, after examination upon chemistry, materia medica and pharmacy, were granted their licence as apothecaries.

The following gentlemen having passed their preliminary examination, were admitted to enter upon the study of medicine—Messrs Francis Pouliot, Alf. Simard, Benj. Goulet, Louis Duhamel, Pierre Pelletier, Adolphe Toupin, Mezeine Riviere, Magloire Charland.

The examinations being over, the President read the following notice of motion, and ordered its insertion in the minutes of this meeting.

The undersigned, two of the Governors of the College of physicians and surgeon, hereby give notice, that they shall move at the next triennial meeting, for the following alteration in the bye-laws of said College, to wit.—“That the second section of the Bye-laws, Rules and Regulations of the College of Physicians and Surgeons of Lower Canada, be so far amended or altered that the future triennial meeting shall be held at Richmond, or other central place instead of Three Rivers.

(Signed,) J. CHAMBERLIN, M. D.
HECTOR PELTIER, M. D.

Quebec, 9th October, 1855.

The President having declared that there was no other business before the chair, on motion of Dr. Peltier, a vote of thanks was given to the Principal, and other officers of the Laval University, for their courtesy in allowing the use of the rooms of the medical school, to the Governors of the College for the meeting of the Board. After which the Board adjourned.

J. E. J. LANDRY, M. D.,
Secretary for the district of Quebec.

Honor to the fallen brave.—The epidemic of yellow fever at Norfolk and Portsmouth has afforded opportunity for the display of heroism, which, if we except the case of the noble Thomson, who attended the Russians after the battle of the Alma, and a few others, is not equalled by any thing that has found place in the bloody records of the mere military exploits in the East. “Forty Physicians,” says our talented contemporary the Virginia Medical and Surgical Journal, “have fallen in the hopeless contest! Exhausted with fatigues and watchings; dispirited by their want of success; pressed down, with the weight of res-
