

*Whereas*, Since the continued presence in the homes of the poor and others of so many cases of this chronic disease means almost certain death to the patient, and probable infection to other members of the family, be it therefore

*Resolved*, That this Conference does publish, and instruct the Secretary to forward, copies of these resolutions to the Legislature, Departments of Education and Municipal Authorities of the several States and Provinces represented in the Conference, urging upon them the imperative need of:

(1) Having all schools and colleges placed under proper medical supervision with regard to ventilation, over-crowding and over-pressure in studies;

(2) Having all hotels, boarding-houses and work-shops where consumptives may be employed placed under municipal supervision and inspection;

(3) Urging all State and Provincial Legislatures to devote public funds, and to encourage private philanthropy, in the establishment of homes or sanatoria in one or more counties or districts of the several States and Provinces, to which tuberculized patients may be sent early, either at their own or municipal expense, and under proper regulations be encouraged to remain therein until recovery shall have taken place; while, at the same time, they shall have prevented the continuance of centres of infection in their homes.

Dr. C. A. Lindsay, Connecticut: I believe that this resolution should be in some way published at once. I do not think it should be held until published in the regular proceedings. I move that the Secretary prepare copies of this resolution at his early convenience and send them to every State and Provincial Board of Health that they may have opportunity to bring the matter before their Legislatures. Motion was seconded and carried.
