

13. We underline the vital contribution of nuclear power to a more secure energy supply. The role of nuclear energy has to be increased if world energy needs are to be met. We shall therefore have to expand our nuclear generating capacity. We will continue to give the highest priority to ensuring the health and safety of the public and to perfecting methods for dealing with spent fuels and disposal of nuclear waste. We reaffirm the importance of ensuring the reliable supply of nuclear fuel and minimising the risk of nuclear proliferation.

Energy

14. The studies made by the International Nuclear Fuel Cycle Evaluation Group, launched at the London Summit in 1977, are a significant contribution to the use of nuclear energy. We welcome their findings with respect to: increasing predictable supplies; the most effective utilization of uranium sources, including the development of advanced technologies; and the minimization of proliferation risks, including support of International Atomic Energy Agency (IAEA) safeguards. We urge all countries to take these findings into account when developing policies and programmes for the peaceful use of nuclear energy.

Energy

15. We will actively support the recommendations of the International Energy Technology Group, proposed at the Tokyo Summit last year, for bringing new energy technologies into commercial use at the earliest feasible time. As far as national programmes are concerned, we will by mid-1981 adopt a two-phased approach: first, listing the numbers and types of commercial scale plants to be constructed in each of our countries by the mid-1980s, and, second, indicating quantitative projections for expanding production by 1990, 1995 and 2000, as a basis for future actions. As far as international programmes are concerned, we will join others in creating an international team to promote collaboration among interested nations on specific projects.

Energy

16. A high level group of representatives of our countries and of the EEC Commission will review periodically the results achieved in these fields.
