

*Estimated value of the Food.* The fodder, the grain and the roots were estimated at the current market values in Guelph, less the cost of marketing from an Ontario farm under average conditions. (See Bulletin LXVIII, p. 5.) The home value, therefore, put upon the hay was \$9 per ton, the unthreshed oats \$6, the roots sliced 6 cents per bushel, the oats 26 cents, and the peas 50 cents. The bran was valued at \$14 per ton and the silage at \$2.

*Food consumed.* The amount of food consumed by the lambs, not including the rape, from the time they reached the farm until they were delivered for shipment, and the respective values of the same are as follows:

Food.	Value.
Hay, 54,396 lb .....	\$244 78
Oats in sheaf, 4,040 lb .....	12 12
Oats, 57,332 lb .....	438 42
Peas, 11,458 lb .....	105 03
Bran, 3,212 lb .....	22 48
Roots, 128,774 lb .....	128 77
Silage, 9,050 lb .....	9 05
Total .....	\$960 65

*Disposal of the Lambs.* The lambs were delivered for shipment as stated in Table II below:

Dates of sales.	Markets.	No. of lambs in each sale.	Weight of each group sold.	Price per lb.	Total value of each group.
			lb.	c.	\$ c.
January 8	Buffalo .....	160	13,573	5½	746 51
March 8	Ontario .....	50	3,340	5½	187 87
March 9	Halifax .....	126	11,450	5½	644 06
April 12	Halifax .....	63	5,900	6	354 00
May 9	England .....	99	13,103	7	917 21
April 26	Ontario .....	99	8,660	6	519 60
April 12	Halifax .....	20	2,738	7	191 66
	Ontario .....	26			68 50
	Ontario .....	17 (skins)			12 75
	Died on transit or strayed.	6			
Total .....					\$3,642 16

The lambs which are represented as having been sold at a low price in the home market were ill-doers. From the 23 lambs which died on transit or afterwards, the only revenue was that obtained from the skins of 17 head, while they are all charged against the experiment. It will also be observed that the price received increases with the advance of the season. The figures in the right
