## FARM HELP COST MORE LAST YEAR

Average Wages Show an Increase Over Preceding Periods.

Ottawa, March 10.—The dominion bureau of statistics publishes today its annual report on the average values for the year 1919 of estimates of (1) the value of farm lands, (2) the wages for farm help, and (3) the value of farm live stock and of wool. These estimates have been compiled from the returns of a large corps of correspondents throughout every province of the dominion.

The average value of farm land for the dominion, including improved and unimproved land, together with the value of dwellings and other farm buildings, is placed at \$52 per acre, as compared with \$46 last year. \$44 in 1917, \$41 in 1916, \$40 in 1915, \$38 in 1914 and \$36 in 1913. This shows an enhancement in value of 10 per cent in 1919, and 36 per cent in five years. By provinces, the value is highest in British Columbia, being \$174 as compared with an estimate unit value of \$149 per acre in 1917 and 1918. Ontario, with an estimated average value of \$66 per acre, and Quebec with \$72 per acre, are above the average for the dominion. Last year both Ontario and Quebec had the average value of farm lands at \$57 per acre. In Prince Edward Island the average value has risen from \$44 per acre, the highest previous value, to \$55. Nova Scotia also shows an increase from \$38 per acre in 1918 to \$41 in 1919. New Brunswick valued its farm land at \$19 per acre in 1919, \$22 in 1918, \$20 in 1917, \$19 in 1916, \$18 in 1915, \$17 in 1914, \$16 in 1913, \$15 in 1912, \$14 in 1911, \$13 in 1910, \$12 in 1909,
