

## FOLLOW GREEN LINE NOW BEING USED TO HANDLE SEA TRAFFIC

Some Principle To Guide the  
Ships in New York  
Harbor.

New York, Aug. 17.—The principle of "follow the green line," used successfully by the management of New York's subway system in handling crowds at congested transfer points, has been adapted in a measure to insure safety to ships at sea around crowded harbors. Instead of a visible "green line," however, a device has been perfected whereby vessels seeking their way into harbor in thick weather can follow with safety a submerged and energized wire.

In the outer reaches of New York harbor, where deep water meets shoals, there begins a narrow passage way known as Ambrose channel. This channel leads up through the narrows into the inner harbor and to the docks, and in this channel the guiding cable has been laid. Ships properly equipped to take advantage of its guiding powers can follow it through any kind of weather with the same degree of assurance as can the passenger who seeks to make his way from Grand Central terminal to Times Square.

The device consists of a cable sixteen miles long laid in the centre of the channel. It is energized with an alternating current from the shore. Ships to take advantage of it, must be equipped with audiotones or listening devices attached to the hull. Approaching the channel the sound waves emitted by the cable can be heard for some distance, and the increasing or decreasing strength of the sound enables the ship to be steered until it is right over the source. It is then a simple matter to follow its course through the dredged channel despite storm or fog, which would make the marking buoys invisible or would tend to confuse the warning notes of automatic bell and whistle markers.

This cable is but an additional protection for shipping entering American ports. It supplements the radio compass installed and operated by the naval communications service now in successful use all along the Atlantic coast. By the compass, ships can ascertain their exact position in any kind of weather. Another protection recently tried out by the navy department is a machine for determining depth of water and proximity of other ships through the readings of sounds from the propellers reflected back from the bottom or nearby bodies.

## DRAFT REGULATIONS TO OPEN UP VAST POWER RESOURCES

Washington Officials Make  
Plans For Administration of Law.

WASHINGTON, Aug. 17.—Regulations for the administration of the federal act opening up the country's vast water power resources to private development are now being drafted. As soon as they are completed the water power commission, composed of the secretaries of war, interior and agriculture, will hold hearings on them. The commission, of which Secretary Baker has been appointed chairman by President Wilson, will hold its first meeting immediately upon Secretary Payne's return from Alaska. The hearings on the regulations will be pushed as speedily as possible, so that the water power legislation, which has been ten years in making, can be put into effect without undue delay.

The tentative regulations are being drawn up by a special committee of the war, interior and agriculture departments. It is composed of Major-General H. Crowder, representing the war department; O. C. Merrill, water power expert in the forestry service, who has been designated executive secretary of the commission; and H. A. Stabler of the interior department.

Members of the committee say the regulations will be extensive, and that they probably will be announced in series, with open hearings on each group before they are made final. Those relating to form and location of development for survey, permit or license, will be the first announced. The most difficult problem involved in drawing up the regulations, members of the committee say, is that of establishing a uniform system of accounting for licenses as required by the act.

Under the water power bill the commission is empowered to issue licenses for a period not exceeding 50 years. The licensee will pay to the government reasonable annual charges in amount to be fixed by the commission. Upon the expiration of any license the government, if two years notice in writing has been given by the licensee, will have the right to take over and operate any water power development after payment of the net investment of the licensee in the project or projects taken, not to exceed the value of the property, plus such reasonable damages, if any, to the property of the licensee as may be caused by the severance therefrom of property taken.

In cases where such notice has not been given, the government also will have the right to take over upon mutual agreement with the licensee any property under the terms of the bill, subject to the payment of the net investment.

## THAT CHANGE IN WOMAN'S LIFE

Mrs. Godden Tells How It May  
Be Passed in Safety and  
Comfort.

Fremont, O.—"I was passing through the critical period of life, being forty-

six years of age, and had all the symptoms incident to that change—heat flashes, nervousness, and was in a general run-down condition, so it was hard for me to do my work."

Lynne E. Pinkham's Vegetable Compound was recommended to me as the best remedy for my troubles, which it surely proved to be. I feel better and stronger in every way since taking it, and the annoying symptoms have disappeared."

Mrs. M. Godden, 925 Napoleon street, Fremont, Ohio.

Such annoying symptoms as heat flashes, nervousness, headache, dizziness, irritability and "the blues," may be speedily overcome and the system restored to normal conditions by this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound.

If any complications present themselves write the Pinkham Medicine Company, Lynn, Mass., for suggestions how to overcome them. The result of forty years' experience is at your service and your letter held in strict confidence.

# Dowler's Dollar Day

## GIGANTIC ONE-DAY SALE INVOLVING ALL SUMMER LINES OF MEN'S AND BOYS' APPAREL

To the money-wise people of London and surrounding country: Unprecedented values, memories of former Dowler Dollar Days and the high quality of all Dowler goods make a three-fold appeal of irresistible force. You know the Dowler policy. This time we've gone the limit. Look for substantial savings ---expect remarkable values---come early---come with the crowds.

### Free Coupons

The Dollar Day Aeroplane will drop Dowler coupons entitling the finder to a rebate on any goods bought Dollar Day.

## COSTS HALF MILLION TO PUBLISH RECORD OF U. S. CONGRESS

Total Last Year Was \$537,640, Government Accounting States.

WASHINGTON, Aug. 17.—(Associated Press).—The cost of publishing the Congressional Record, the Government publication recording daily everything that is said and done in Congress, as well as some things outside, was \$537,640 last year, practically the same as for 1918, but about \$300,000 less than the 1917 cost.

These figures were given recently by Russell O. Beene, accountant at the Government printing office, in answer to

an inquiry of Representative Mages of New York.

Beene said the possible savings would result from the discontinuance of the record. Mr. Beene gave the cost for 1917 as \$801,740.88, and for 1918 as \$557,640.

Cornelius Ford, the public printer, was asked for an explanation of the high figure in 1917, but confessed his ignorance unless it happened that Congress "did more talking" that year. Mr. Ford said that in 1917, Congress was in session 250 days; in 1918, 307 days, and in 1919, 279 days.

The printed pages in the Record for these years were: 652,511,984 in 1917, 563,872,587 in 1918, and 455,130,450 in 1919. The cost of paper has increased greatly within the past three years, but the use of a lighter and less expensive quality has helped reduce the aggregate cost of the paper used. For 1919, the paper cost was \$180,000 as compared with \$162,000 in 1918, and \$200,000 in 1917.

PILGRIMAGE TO MECCA.

MANILA, P. I., Aug. 17.—Scores of Mohammedan Moslems are reported assembling at Zamboanga, island of Mindanao, to make the pilgrimage to the great mosque at Mecca. Many have saved for years to make the trip, which, according to Mohammedan faith, every

believer should undertake at some time during his life.

Government officials at Zamboanga say many who have made the pilgrimage in years past have returned in better health and stipped of their belongings. Often they have been brought home at government expense.

ASSISTS IN UPKEEP OF BIRTHPLACE OF GEORGE WASHINGTON

WASHINGTON, Aug. 17.—(Associated Press).—Every year Congress grants \$100 for the repair of fences and for cleaning up and maintaining the 13-acre reservation at Wakefield, Va., where George Washington was born.

There is no dwelling on the place, but a monument marks the place of native birth of "the father of his country."

Wakefield is 110 miles from Washington, and is not often visited because it is not easily accessible. It is a mile and a half from the Potomac, and pilgrims going by water must also trudge overland to reach it. Excursion steamers no longer stop, the old Government wharf having been partly carried away by ice and floods and never repaired.

## FRANCE HAS WORK TO DO IN ASSISTING CHINA'S DEVELOPMENT

TOKYO, Aug. 17.—Former Premier Paul Painleve of France, who stopped here on his way from America to China, was quoted as saying as he disembarked at Tokyo:

"The peace of the world has nothing to gain from an Americanized or an Anglicized China. Without in any way meaning to offend our friends or allies, we feel that to the French belongs the moral obligation to encourage and develop the intellectual, scientific and technical relations which exist already between China and France."

"France must not fail at this time, while China, seeking to modernize herself, is calling for intellectual guides and technical counselors to answer that call. Anything that fails to present French culture to China leaves the way open for German Kultur to our hurt."

Mr. Painleve said his mission to China, which is his destination, had nothing to do with finance, but was purely educational, scientific and technical, with the idea of laying a foundation for a more thorough knowledge of the Far East.

Above all, it was his aim to guide toward France the Chinese who are seeking a higher education.

His visit is deemed here to be important in view of the preparations already under way in France to receive Chinese students, who are increasing in number. A project has been started at Paris by Senator and Mme. Hugues le Roux to found a social club for visiting Chinese.

DAILY AERIAL MAIL RUNS BETWEEN LONDON AND AMSTERDAM NOW

London, Aug. 17.—By Canadian Press.—A daily service for the dispatch of mails by aeroplane between London and Amsterdam began on July 15.

The air mail fee—which is in addition to the ordinary foreign postage charge—has been fixed at the low rate of 3d (6 cents) per packet. The fee for express delivery is 6d (12 cents) per packet. Express packets are delivered normally the same evening in Amsterdam and Rotterdam.

It is possible by this means for a London business house to receive a reply from Amsterdam within about 30 hours.

## ARGENTINA SHOWING INCREASED PROSPERITY

BUENOS AIRES, Aug. 17.—Increased prosperity this year, in comparison with 1919, is indicated by banking and railroad statistics of Argentina, which have just been published. Official banking reports show that between May 31, 1919, and the same date this year deposits increased 21 per cent, loans and discounts 12 per cent, and balances on hand 40 per cent.

Of the 22,141 miles of railroad in the country only one group of 1,188 miles has failed to show increased aggregate receipts, according to a table compiled by the Review of the River Plate, showing conditions for the present year. The remaining lines have all had substantial increases. All railroads in Uruguay and Paraguay and all trunk lines in Argentina have also shown increases.

PROTEST BECAUSE OF BRITAIN'S TREATMENT OF ARCHBISHOP MANNIX

St. John, N. B., Aug. 18.—At a meeting of the local branch of the self-de-
