NEW YORK MARKET SHOWED INDECISION

Strength and Weakness Alternated According to News From Washington.

SOLD OFF AT CLOSE

Motor Stocks Declined Sharply and Affected Rest of the List.

NEW YORK, Sept. 1.—Alternate periods of strength and weakness attended today's irregular market, the reversal movement deriving its impetus almost wholly from the changing aspect of the railway situation at Washington.

Prices were almost universally strong at the outset, but stocks were freely supplied on the advance and profit-taking soon wiped out most gains.

During the intermediate stage the list was again elevated on the advance of speculative marine preferred, Inspiration Copper and Kelly-Springfield Tire to new high records.

Marine preferred touched 10 1/2, with 5 1/2 for Inspiration and 8 1/2 for Kelly-Springfield. These quotations were shaded in the final hour, when weakness in the motor group, notably Studebaker and Willys-Overland, unsettled the entire list, the market closing with a heavy loss.

Rails Closely Watched. Bulls were watched with unusual interest because of their direct relation to expanding conditions. Reading, St. Paul, Chesapeake and some of the eastern trunk lines and some of the western lines of pressure, their initial advances being largely substituted by losses of 1 to 2 points.

U. S. Steel was a sheet anchor for the market, its early advance, plus the regular and extra dividends of 2 1/2 per cent, bringing it up to 1/2 of its record price and carrying other industrials with it. Professional pressure and the temptation to realize on the rise were too strong, however, and the market closed with these stocks closed at net declines.

Total sales amounted to 730,000 shares. The most significant event of the day in its broader application to financial markets was the further break in General Motors, a depreciation of fully 12 per cent, a depreciation of fully 12 per cent, a depreciation of fully 12 per cent, a depreciation of fully 12 per cent.

Hamilton B. Willis' special correspondent in Porcupine wired yesterday: "Vein at Newray uncovered for 80 ft., averaging 10 feet wide, with 5 feet of high grade. Best discovery ever made in the camp." This and other outside information came down from Porcupine yesterday, testifying to the character of the recent strike on Newray, and confidence in the future of the property was further shown by fairly heavy buying of Newray stock by northern investors.

NEWRAY FIND REPORTED BEST EVER IN CAMP

Vein Uncovered for Considerable Distance.
