

May has thirty-one days.

Astronomical.

Venus, by the ancient poets called *Phosphor*, or *Lucifer*, when it appeared to the west of the sun, at which time it is morning star, and ushers in the light or day; and *Hesperus* or *Vesper*, when eastward of the sun, or evening star, the second planet in order from the sun, is the nearest to the earth, and on that account appears to be the largest and most beautiful of all the planets. The heat and light at Venus are nearly double what they are at the earth.

		MOON.						HIGH WATER.	
Sets.	Equation of time sub. from App.	Declination	Rises.	South's.	Sets.	Age.	Place.	At Halifax.	At St. John's N.F.
