Why do People Wake up only Half Rested

ALL day long you are drawing on nervous force stored up during sleep. Then you go to bed, and Nature begins storing up fresh energy for tomorrow. When you wake up only half-rested, you haven't had the right kind of sleep.

If you have any trouble in sleeping soundly—probably your sleeping equipment is at fault. Wooden beds are apt to creak. Ordinary metal beds often rattle slightly—just enough to set your sleeping nerves on edge. Or perhaps your bedspring sags or humps—keeps your muscles tense instead of relaxed. It may be your mattress is lumpy or uneven, or your pillow does not conform to your head and neck. The Simmons Metal Bed is noiseless. Just as the sleep-inducing Spring is a

Simmons "Waldorf," of specially tempered spring coils. Fine Springs that fit the contour of the body and support the spine in a straight line, insuring perfect circulation and restoring the energy used up in the fatigue of the day.

Simmons Felt Mattresses are the result of twenty-five years' study of equipment for sound, natural sleep. Made of pure, new cotton in clean, sun-lit factories. Used in thousands of fastidious Canadian homes.

And Simmons Pillows, which rest the head and neck exactly as they need to be rested.

Simmons Limited is specializing in *Twin Beds*. One sleeper does not disturb the other or communicate colds and other infections.

Simmons Metal Beds, Brass Beds, Springs, Day Beds and Children's Cribs are the most popular sleeping equipment in Canada today—in the stores of leading merchants right here in town—at prices little if any higher than the ordinary.

Sleep is a big subject! Write us for the booklet, "What Leading Medical Journals and Health Magazines Say about Separate Beds and Sound Sleep." Free of Charge.
