BIRTHDAY CAKE, DECORATION.

For the small boy's or girl's birthday celebration the latest wrinkle is to cover the cake entirely with white icing and inscribe the name and date in pink icing in the centre. Around the base of the cake—which usually constitutes the principal ornament of the table—big pink roses, corresponding in number to the years that the youthful host or hostess has attained, are arranged and in the centre of each rose is placed a tiny pink candle or an electric light bulb.

THE KIND OF A JUDGE HE WANT-

The story is told of an Irish woman who tried to console her husband with the remark that he would have a fair trial and an upright judge. "Yerra. woman," replied her sponse, "what'd I want wid an upright judge? What I wants is a judge that'll lean a little."

Whatever medium will attract attention—interest the public—is my idea of successful publicity.—Geo, H. Heafford, G. P. A., C. M. & St. P. R. R.

BOSTON SHOCKED.

Electric Current Astray—It Got Inte the Iron Posts and Letter Boxes on Bay State Road.

BOSTON, Oct. 3.—An electric current which got astray charged the iron posts and letter boxes in Bay State road last evening, and two persons who thoughtlessly leaned against a post received shocks which nearly threw them off

snocks which nearly threw them off their feet.

The police of division 16 were notified and they sent word to the electric light company, and some electricitians came around to try to discover the leak and stop it. Up to midnight they hadn't found where the leak was.

Patrolimen were sent out from division 16 to keep people away from the posts and letter boxes, and no mail could be collected because the current passing into the poles and through them to the letter boxes kept growing in volume. At 11 o'clock, as a measure of safety, the current was shut off from the electric lamps on the Bay State road circuit, and that exclusive neighborhood was left in comparative darkness.

RULED OFF THE TURF

For Administrating Stimulating Drugs to a Horse.

CHICAGO, Ills., Oct. 4.—Former Alderman F. F. Gazzolo has been warned off the Harlem race track, and Trainer E. L. Tally has been ruled off the turf by Judge Hamiltog and his associates of the Harlem Jockey Club. In their ruling the track officials charge Gazzolo and Tally with having "administered stimulating drugs" to Emma A. M., in the last race of Wednesday. B. Butler, the owner of the antmal, is exonerated.

THE COAL SITUATION.

Retailing at Rate of \$37.50 per Ton in New York.

in New York.

NEW YORK, Oct. 4.—Coal dealers in this city were dismayed by the news that President Roosevelr's efforts to effect a settlement of the differences between the anthracite operators and the miners had come to naught. Coal retailed in the tenement districts is now selling at 30 cents a pail, which makes a ton cost \$37.50. For a number of years the Salvation Army has bought large quantities of coal to sell to the poor at the rate of three cents a pail. One of the officers has announced, however, that the army is unable to obtain a supply for the coming winter. A firm of miners and dealers, which shipped a year ago, 2,500 tons of anthracite to Rouen, France, as an experient, has found that the coal was not used, and has brought it back, and sold it here for delivery on its arrival. Although the cost of reshipment to this country is calculated at \$4 a ton, even at this rate the deal will be a profitable one. A steamer will sail early next month for this port with 6,000 tons Scotch anthracite. This will be the first importation of Scotch coal. Thus far more than 50,000 tons of foreign anthracite has been brought to this port since the strike reached an acute stage. The great bulk of th's was purchased by the Gas and Elevated Railroad Companies.

MRS. ROOSEVELIT'S KITCHEN.

MRS. ROOSEVELT'S KITCHEN.

MRS. ROOSEVELT'S KITCHEN.

Since Mrs. Lincoln's regime the kitchens of the White House have remained in the forthwest comer of the basement. There are two of them—the smaller, or family, kitchen, and the larger one, where the state diners are prepared. When Mrs. Harrison came in as mistress of the White House these rooms were in a deplorable condition—the walls were dark, the floors were sunken and the place was simply in the possession of the rats and mice. She tried every known expedient to get rid of the pests, but without avail. Then she had all the flooring in both kitchens and laundries taken out, the walls scraped and even the space above the ceilings cleanaged. The floors were replaced with white brick tiling and the remainder newly plantered. This heroic treatment did away with the rodents and left the rooms delightfully light and alry, as they are today.

ents and left the rooms delightfully light and airy, as they are today. On the east side of the large kitchen, in place of the mammoth fireplace of the original one, there is now an up-to-date hooded range, extending almost the width of the room. Across from it are the dish washing sinks, connected with the hot and cold water pipes. From the centre of the ceiling hangs a great circular hoop bristling with hooks, which are filled with shining brass pots and kettles. On the west side of the apartment are the tall cupboard resting on the flour and meal bins, while in its centre is the long kitchen table.—Woman's Home Companion.

IN A TIGHT PLACE.

Colonel Lee is remembered by hundreds of Americans for his bright man-Colonel Lee is remembered by hundreds of Americans for his bright manner and happy, apt remarks, says a contributor to an English periodical in reference to the former British military attache who, followed our army to Cuba. When the project of erecting an equestrian statue to General Washington in New York was proposed Colonel Lee was intrusted with one of the subscription papers for circulation. Shortly after receiving it he approached a well known citizen and asked for a subscription. But the citizen declined to subscribe, stating in a rather pompous manner, "I do not consider, sir, that there is any necessity for a monument to Mr. Washington. His fame is undying, sir, he is enshrined in the hearts of his countrymen." "Is he enshrined in your heart?" softly inquired the colonel. "He is, sir." "Well, all I have to say," retorted Colonel Lee, "is that he is in a tight place."

erchants Meet at Board of Trade Rooms to Discuss Shipments to South Africa.

(Recorder, Thursday.)

(Recorder, Thursday.)

Pursuant to notice given, a meeting of merchants was held yesterday afternoon in the Board of Trade rooms in regard to supplying freights for the first steamer leaving Hallfax for the South African market. Geo. S., Campbell, president of the Board of Trade, presided, and among others present were Frank Simson, Wm. Roche, M. P. P., Geo. J. Troop, M. L. C., I. C. Stewart, A. E. Jones, Edw. G. Kenny, H. Hart, J. E. DeWolf, A. M. Payne, Jas. Hall, Howard Smith, W. A. Black and Fred Hart.

The first steamer sailing from Hallfax and St. John will be the Orlana of the Furness Line. She will leave on Dec. 18 for Cape Town, Port Elizabeth and Durban. The ports of call are subject to change and other ports may be substituted or added if sufficient inducement offers. Mr. Campbell, after stating the object for which the meeting had been called, read a letter from Hon. W. S. Fielding, in which the minister of finance referred to the inauguration of the new service, and stated that through his efforts Hallfax had been made one of the ports of call, and that the success of the movement depended very largely upon the shipments made.

Wm. Roche, M. P., said that the

made.

Wm. Roche, M. P., said that the goods sent should be of the very best kind. The best specimens of articles should be produced. No interior article in food stuffs should be sent. He thought a good trade in butter and cheese could be worked up. The secretary was instructed to write the manufacturers in Nova Scotia and P. E. Islant, and also the exporters of butter, cheese and hog products with the view of having them send samples by the first steamer from this port.

CAREFUL OF HIS TRAINING.

On the occasion of a visit of a travelling circus to a small town the boys of the surrounding country were all agog with excitement, raised by the flaming posters and gorgeous processions.

sion.

The young son of a notoriously close-fisted old farmer rushed in to his father and eagefly importuned him for sixpence to "see the circus."

"What!" exclaimed the old skinflint, "sixpence to see the circus, and here only last week I let you go up to Farmer Jones's field to see the cellpse of the moon. Young nan, do you want your life to be one perpetual round of galety?"

SHOT THREE MOOSE. (Bridgetown Monitor.)

(Bridgetown Monitor.)

Messrs. F. H. Willett and Alfred Ingils, of Tupperville, had rare luck last week while hunting in the woods back of Perotte, with James Ramsey as caller and guide. Their week's outing had come to an end and they were about to proceed homeward when they came upon a group of three moose, and their shots brought down the three. The largest, a fine bull moose was shot by Mr. Willett, and weighed when dressed \$10 ibs. Its head was magnificent, the horns measuring fifty inches across. Messrs. Willett and Ingils speak very highly of the abilities of their guide, who is considered one of the best in the country.

together as sumptuously as the money will permit.

Chicago has an even more curious club. It is composed of young men whose Christian composed of young men whose Christian composed to marry following the composed to marry following composed to marry following composed to marry following composed to marry following couples who were on a jaunt in the country compared notes concerning the Christian names of those present, and it turned out that all the males were Johns and all the girls Marrys. The club was started then and there. Only men of the town have formed a club for the protection of the girls from the attentions of outsiders. Several brutal outrages have been credited to the members of this queer organization, who have assaulted young men who came poaching on their preserves, and in some instances sent back to their native villages more dead than alive.

Clarence Lamberton Dies of Shock-Grandmother Drops Dead When

SUFFIELD, Conn., Oct. 2.—Tenyear-old Clarence Lamberton died today from injuries received while hunting yesterday, and his aged grandmother fell dead when told the news. It was the first day of the open season and also the first gunning experience of young Lumberton, who started out yesterday.afternoon with John Barrett, who is 25 years old. Barrett fell and the accidental discharge of his gun resulted in a frightful wound in Lamberton was carried to his home on a stretcher. As a last resort the surgeons decided today to amputate the thigh near the body. Lamberton was unable to survive the shock and died soon after the operation was performed. Barrett is nearly frantic with grief.

Deposits in Massachusetts Likely to be Developed.

NEW YORK, Oct. 4.—Deposits of anthracite coal in Massachusetts; which were once operated on a large scale, may be again utilized if the present situation continues, says a Beston despatch to the Times. In 1835 a bed of anthracite was discovered in Mansfield, which has since been explored and with others in that place proved to be of considerable importance. It was thought at the time that they would develop into extensive and valuable coal fields.

coal fields.

Three companies opened pits in different places, but times were hard and operations were suspended in 1888, in the hope of obtaining aid from the state to resume them on a larger scale.

the Lakes

DULUTH, Minn., Oct. 4.—The tug strike is not only now settled but all details of the settlement have been adjusted. Every tug in the Union Towing and Wrecking Company's fleet is now manned by union men. The last boats to be equipped thus were the Zenith and the Excelsior, and this was done yesterday. The real situation proved to be that there was danger of another tie up unless all the boats were promptly unionized. The result of the strike is regarded by the tug employes as a complete victory for them.

The independent tug line, which was an outcome of the strike, expects to continue the towing business as usual. The company has increased its capital from \$25.000 to \$55.000 to

continue the towing business as usual. The company has increased its capita from \$25,000 to \$50,000.

GENESIS A BOOK OF MYTHS.

Jewish Rabbi Makes a Startling Statement to His People.

ment to His People.

CHICAGO, Oct. 3.—Dr. Emile G. Hirsch, preaching to the congregation of Temple Israel declared that the book of Genesis was a book of myths.

"The book of Genesis," said Dr. Hirsh, "is not a record of science or fact. It is a book of myths, the myths reflecting the spirit of all humanity. The story of the first man in the book is merely the fate of that man's family, illustrating the whole race at that time. One family was saved from the deluge. That, teo, is a myth."

saved from the deluge. That, teo, is a myth."

In his argument Dr. Hirsch attempted to show that all races came from one stock. "The unity of the races is thus emphasized," he said. He decried the idea that the Jews are an exclusive race or that it is the ambition of the race to regain a state in Jerusalem. The Jewish race is a part of all humanity working for the good of humanity, he declared.

BETTER LEFT UNSAID.

Under the caption "The Art of Putting Things," an English author has given some very amusing examples of saying things in a queer way. One of the most unfortunate recorded attempts to escape from a conversational difficulty was made by an east end curate who cultivated the friendship of mechanics.

chanics.

One day a carpenter came to him and said, "I have brought my boy's likeness, as you said you'd like to have it."

"How good of you to remember it!" said the curate. "What a capital likeness! How is he?"

"Why, sir, don't you remember?" said the carpenter. "He's dead."

"Oh, yes, of course I know that," replied the curate. "I mean how's the man that took the photograph?"

(Baltimore American.)

"And," said the good fairy, "for your noble deeds I will grant you any wish you may desire."

"I will choose," said the lucky person, "a ton of coal."

Hereupon there arose great consternation in the ranks of the fairies, which terminated in a proposition to arbitrate the matter in order, if possible, to compromise on a ton of diamonds.

A Russian specialist has decided that, contrary to the general opinion, electric light plays less havoe with the eyes than other forms of artificial light. He bases his deductions on the fact that disease and damage to the eye are proportioned to the frequency of the closure of the lids. He found that the lids close in a minute 6.8 times with candle light, 2.8 times with say light, 2.2 times with sun light and 1.8 times with electric light.—Medical Record.
