

DRUGS ARE DEADLY POISONS THAT WALK, PESTILENCE AND Famine —DR. J. M. GOODE

"Medicine Not a Science," But "An Ineffectual Speculation"—These and Other Unsparring Criticisms of Their Own Profession Are Made by Eminent Physicians—Prominent Doctor Tells Why Drugs Don't Cure—Electricity the Remedy of Today.

SHALL WE THROW PHYSIC TO THE DOGS? Has medicine ceased to progress, and are all drugs poisons?

"The science of medicine is founded upon conjecture and improved by murder," declares one of the greatest physicians in the world, Sir Astley Cooper, M. D., physician to the Queen of England.

"Drug medicines do but cure one disease by producing another," asserts Dr. Martin Payne, professor in the New York University Medical College.

"A mild mercurial course and mildy cutting a man's throat are synonymous terms," says Professor Gillman, of the New York College of Physicians and Surgeons.

More and more eminent physicians are declaring each year that medical science has made little progress since the beginning of man.

Dr. M. O. Terry, formerly surgeon-general of New York, announced recently that, in his opinion, very few of the cases diagnosed as appendicitis were that disease at all, and says that in many cases where operations were performed for appendicitis a short vacation or a series of morning walks would have prevented the serious turn taken by the disease.

Dr. Osler, of "chloroform-ergo" fame, says: "Pain in the stomach nowadays is always appendicitis, and is recognized by the physician's wife over the telephone."

Dr. M. J. Rodermund, of Milwaukee, goes further than either of these. He declares: "It is an absolute impossibility for the appendix in a man to become obstructed. I have operated and assisted in thirty-four operations of so-called appendicitis, but never have I seen a diseased appendix. Yet I have seen a number of healthy, blooming young men and women sent to the angels just because the surgeons wanted the fee of three or five hundred dollars. I mean just what I say; that it was absolutely no bones about saying so before the operation was performed."

90 P. C. NOT APPENDICITIS. Dr. A. B. Stockman quotes the statement of a physician at a meeting of physicians in Boston. This doctor has performed more operations for appendicitis than any other American doctor. He declared at the Boston meeting of doctors that 90 per cent of the cases in which he operated for appendicitis proved not to be that disease at all.

"We always tell a patient and his friends that the operation was successful," he said.

THE CONVICTION OF EXPERIENCE I declare, as my conscientious conviction, founded on long experience, that if there were not a single physician, surgeon, midwife, chemist, apothecary, druggist nor drug on the face of the earth, there would be less sickness and less mortality than now prevail.—James Johnson, M.D., F.R.S.

masse; when human bones were ground up and drunk for the cure of ulcers; when human blood was prescribed for epilepsy, Aqua Divina, a remedy advertised as having great virtues, was made by cutting in pieces the body of a healthy man who had died a violent death and distilling it with ground human bones. It was given as a draft.

MEDICINES ARE POISONOUS
In their zeal to do good, physicians have done much harm; they have hurried to the grave many who would have recovered if left to nature. All our curative agents are poisons, and, as a consequence every dose diminishes the patient's vitality.—Dr. Alonzo Clark, Professor in the New York College of Physicians and Surgeons.

THE BEST DOCTOR
No doctor can cure all diseases. That's all "moonshine." They are "pretenders." If you can't cure a man, tell him so.
Physicians use too many drugs.
I believe that the best doctor is a drug to stop the pain, but does not remove the cause. Every time you eat the pain returns, and you have to take the drug again.

SCORES "PRESCRIPTION NONSENSE."
"This nonsense about the writing of prescriptions is on a par with all other frauds of the medical profession," says this writer. "It is a business of pretentious misrepresentation and frauds."
Even such a high authority as the London Lancet, said in a recent issue: "In medicine and surgery, as in all arts and sciences, methods become general, they lapse in disease, to be revived possibly at a later period and then to achieve a popularity which attaches to a supposed new thing."

Some of the most eminent physicians were asked recently to give their opinions of medicine and medical doctors. A few of the replies are here given:
Dr. C. E. Page, Boston, Mass.: "From the time in which the Father of his country, affected by a simple and readily curable malady, pharyngitis, was killed by bleeding, up to the most recent catastrophe, (Feb. 3, 1907), of a needless operation for appendicitis, which killed a distinguished New York statesman, such operations have killed no end of good men and women."

was for many years one of the medical faculty of Harvard Medical School, said before his class:
"The disgrace of medicine is that colossal system of self-deception in which millions have been duped by the cunning and the cunningly cunning, the vegetable kingdom robbed of all its growth, the entrails of animals taxed for their impurities, the poison bags of reptiles drained of their venom, and all the conceivable abominations thus obtained thrust down the throats of individuals suffering from some fault of organization, nourishment or vital stimulation."

Dr. Valentin Motz, the great surgeon, says: "Of all sciences, medicine is the most uncertain."
Dr. Abercrombie, Fellow of the Royal College of Physicians of Edinburgh, says: "Medicine has been called by philosophers the art of conjecturing; the science of guessing."
Dr. Jacob Bigelow, formerly president of the Massachusetts Medical Society, says: "The premature death of medical men brings with it the humiliating conclusion that medicine is still an ineffectual speculation."

Dr. Gregory, of the Edinburgh Medical College, said to his medical class: "Gentlemen, 99 out of every 100 medical facts are medical lies, and medical doctrines are, for the most part, stark, staring nonsense."
Dr. Albert Leffingwell, of the American Humane Association, says: "I do not believe that the average length of human life would be diminished by an hour if all the drugs of Christendom were dumped into the sea—barring, perhaps, half a dozen."

SAYS DRUGS MUST GO.
M. A. McLaughlin, the man who proved that he was five years ahead of Prof. Loeb in discovering that "electricity in life," says that the present system of drugging must be abolished.
He is the inventor of the most successful device for electrifying the human body. His experience has been broad, covering a period of twenty-two years.

He is recognized as one of the leading authorities on electrical treatment and thousands of cured people attest the success of his remedy.
Talking to a reporter yesterday he said:
"The old school doctor has had his day. His methods belong to the mystery and superstition of the dark ages. The physicians of today are doing just what the doctors of a thousand years ago did—dosing sick and suffering humanity with poisons."

"Any man who thinks for himself knows that poison cannot build up anything. They will give temporary relief by stupefying the nerves, but they don't remove the cause of the disease. As long as the cause remains

no cure can be effected.
"If you had a real fine watch and some part of its mechanism broke, would you try to mend it by filling it with oil? No, you would take it to the best watchmaker you knew and have him find the cause of the trouble and repair it."
"Your body is a far more delicate mechanism than any watch. It is the most complicated machine on earth, yet when some vital part breaks down or fails to work properly, you try to make it go by dosing yourself with poisonous drugs."
"All your vital organs, including the heart, stomach, liver and kidneys are run by a power called nerve force. Any doctor will admit that, nerve force is just another name for electricity. When any of these organs break down or become inactive, sickness or disease results. Now you can't cure the trouble until you've moved the cause—repair the part that is broken down. The only way to do this is to give nature the power to do it. All you need, in other words, is electricity. You can't get that from drugs. My method is to restore this electricity wherever lacking, and pain and disease will disappear. That's the natural way of curing."

"Suppose you have stomach trouble; food doesn't digest; gases arise from food fermentations causing severe pains. You go to a doctor who gives you a weak drug to stop the pain, but does not remove the cause. Every time you eat the pain returns, and you have to take the drug again."
"Now, what's the reason the stomach won't digest the food? Simply because it hasn't the strength. It needs energy, nerve power, vitality—no drugs which stimulate for a day and weaken the nerves."
"The world's greatest scientists have proven that the force which runs the human machine, the power that builds vitality and strength, is electricity. Then, the only way to restore a weak organ, to the strength, is to restore electricity where it is needed. I do this with my Electric Belt."

"This Belt is a generator of a powerful but soothing current of electricity, worn about your body while you sleep. It sends a steady unbroken stream of electric life coursing through your nerves and vitals for hours at a time."
"Its touch is gentle without sting or burn. There is no shock; all you feel is a glowing warmth."

THE PRODUCT OF EXPERIENCE.
"I have devoted twenty years to the perfection of my appliance. I have removed defects as fast as they appeared in nearly every case, and have supplied new features from time to time, so that my Belt is in a class by itself."
"The current can be regulated to any desired strength by the pressure of a finger upon the rheostat."
"Compared with my Belt all other electric body appliances are inventions of the blacksmith's hammer."
"It is not upon that point, however, that my success has been founded. My immense business is due to my knowledge of the effect of electricity upon the ailments treated, and the best way to obtain that effect. When you consider that electricity which I supply is life to the organs into which I send it, you can see how I get my results. My success is the result of my cures. If I did not cure, my business would have been worn out long ago."

"When I say that my remedy cures, I don't ask you to believe me until I prove it. I have one or more cured patients in nearly every town on the map. I'll send you the names of those near you, and you can ask them about my treatment."
MR. JAMES WAY, OF OTTAWA, LAKES, QUE., says: "Words would fail to tell you the good that your Belt has done for me. At the time I got it I had been an invalid for nearly two years. Some of the ailments I had for over twenty years. Well, sir, I often say, God bless you and thank God that such a thing was ever discovered by the art of man. The rheumatic pains prevented me from sleeping or walking. One night, when suffering greatly and could not sleep, I placed it around my leg, and after six hours' sleep, I awoke as free from pain as when ten years old. The next night I applied it to the other leg, with the same result, and have not had any pains since. It has done its work, and I would not sell it or exchange it for any other Belt. I expect that, through my recommendation, you will sell not less than a dozen Belts, as a great many came to me to find out the results in my case, and found me walking and working. The name of thirty years ago. I told them that it was Dr. McLaughlin's Belt that had done it all. Now, sir, you can use my name in any way, as I am prepared to vouch what I say

commend your Belt. I will do so. Wishing you every success.
MRS. HUGH KERR of Paris, Ontario, signs her endorsement:
"It was just two months to the day that I laid aside the Belt, all my pains and aches gone. I hope for a long time to come. If it cured nothing but the sleeplessness, I would be well paid for my investment. As I told you a month ago, it is many a long year since I enjoyed a good night's sleep as I now do. I do not lay awake any more at night when others are sleeping. I am sleeping too, and soundly at that, and feel refreshed in the morning when it is time to rise. I feel towards your Belt as you say—like one feels towards a good friend who has done them a great good. No doctor's skill could, or ever did me so much good as your excellent Belt has. I am done buying drugs or doctors' prescriptions for the future. What more can I say?"

LIEUT. P. POTVIN, 253 PRINCE WILLIAM STREET, ST. JOHN, N. B., writes:—
"Dear Sir: I want to say that the Belt I purchased from you has done for me all you claimed it to do; yes, even more. I gave the Belt a good three months' trial, and I feel that I cannot thank you enough for your Heaven-sent Belt, which has taken away all my suffering from Rheumatism. I can, with a clear conscience, recommend it to any one in need, and shall do so with pleasure at any time."

DR. J. M. GOODE
KILLED BY DRUGS
KILLED BY PESTILENCE
KILLED IN WAR
KILLED BY FAMINE

Dear Sir: I want to say that the Belt I purchased from you has done for me all you claimed it to do; yes, even more. I gave the Belt a good three months' trial, and I feel that I cannot thank you enough for your Heaven-sent Belt, which has taken away all my suffering from Rheumatism. I can, with a clear conscience, recommend it to any one in need, and shall do so with pleasure at any time."

DRUGS CANNOT CURE
Of all the errors of our blundering world, the most far-reaching has been the blind faith in the curative power of drugs. Drugs do not cure, cannot cure. They can at best merely relieve and that usually at great cost and injury to the body.—W. R. C. Lanson, M.D.

WOMEN SAVED FROM BUTCHERY
"Thousands of women subjected to dangerous operations which could easily be avoided by the use of my Belt. But the average woman imagines that the only thing to do after drugs fail, is to resort to the surgeon's knife."
"Most female complaints are the result of weak, impoverished nerves. Where there is a deficiency of vital force there is bound to be sluggish action of the organs affected, and then disease."
"My Electric Belt saturates the nerves with a gentle stream of electric life, enabling them to keep up a vigorous and regular action of all the organs of the body. It builds up vitality and strength in every weakened part, thereby removing the cause of the disease."
"A great number of people suffer from pains and aches called rheumatism, or lumbago, or neuralgia, caused by impoverished nerves, crying for aid. The life of these nerves is electricity, and nothing else will cure them. I can send a gentle current from my Belt so that it will convey the life direct to the ailing part, and relief is often felt in an hour. I frequently cure such cases in ten days."

THE SECRET OF SUCCESS.
"The reason so many men fall at everything they attempt is because they are 'quitters.' They have not the courage and ability to tackle and overcome the obstacles they encounter."
"Give me a man who is kept down

TERRIBLE INDICTMENT OF MEDICINES
The effects of our medicines on the human system are in the highest degree uncertain, except, indeed, that they have destroyed more lives than war, pestilence and famine combined.—John Mason & Goode, M.D., F.R.S.

"Give me a man who is kept down

was true. Hoping the Lord will bless you, and that you will be ever successful in your business."
Another gratified man, MR. A. B. SPITTLER, OF BLACK RIVER, N. B., tells his experience with my Belt: "It is with the greatest pleasure that I write to you to let you know what your Belt has done for me. I have never found anything to equal it for my trouble. The greatest thing that seems to me is, when people come around and say, 'Why, you can get about better now, and you have no more asthma.' Then I say that I took medicine for 15 years, but Dr. McLaughlin's Electric Belt cured me in less than 6 months. Now, I want to thank you from the depth of my heart for what you have done for me, and whenever I get an opportunity to recommend your Belt, I will do so. Wishing you every success."
