## An eager Beaver

Clarkson Beavers took to Jack Darling Park last weekend and spent Saturday cleaning up. Beaver Jason Rossi was just one of many Beavers who filled baskets with leaves, twigs and garbage. Afterwards, the hard-working Beavers were treated to a free meal at McDonald's.

## Another first for Metrospan papers

Metrospan Printing & Publishing Ltd., the first major community newspaper company in Canada to introduce on-line Video Display Terminals for its publications, has announced another first.

President D. Ross McCrimmon said last week the company has acquired the first new Goss Super Speed Community Offset Press in Canada with a four high color stacked unit. The new press has an operating speed of 25,000 copies per hour and, with the new color stack unit, is capable of printing up to 16 process color tabloid pages. The Goss will be used to print several Metrospan newspapers as well as pre-printed advertising inserts.

scheduled for June - will occur almost simultaneously with the introduction of the company's new Goss Metroliner press, capable of turning out 70,000 copies an hour, which will also print Metrospan newspapers, high volume commercial jobs and provide top quality color reproduction.

Metrospan readers will see the benefits in increased use of color and brighter papers. The addition of the new presses and mailing room inserting equipment mean Metrospan will boast the most up-to-date printing and distribution facility in Canada.

The Mississauga Times is one of 15 Metrospan newspapers.
