Genuine Bissell Disc Harrow

THE Disc that farmers want. Some good features are—CORRECT BALANCE—Stays down at its work, does not buckle, bind and hump up in the center.

Shape of Disc—Cuts, turns and stirs the soil, where others only scrape the ground.

Light of Draft—Forty hard Anti-friction Balls used in every "Bissell" Harrow relieve the horses.

Ease on Horses' Necks—The HITCH is well back, the seat projects at the rear of frame; no weight on necks

Cyclone Wheel Disc Harrow

651

EASY to move from one field to the other. No danger of dulling discs on hard road. Can be backed or turned anywhere. Each disc is independent and equipped with a pressure spring, the same as a grain drill.

More or less pressure can be applied at the will of the operator. For discing stubble fields, summer fallowing, or plowed land it has no equal.

Can also be used as a weeder or cultivator, being so constructed that the discs can be set at any depth desired; the space between discs being thoroughly worked and much lighter draft than a cultivator.

Write for Catalogue.
