(Continued from page 705)
able for the task of telling the inquirer
that the skins were kept to be worn by
younger rising members of the flock.
There is a verdancy about such greenness
as this that life in the country can never
achieve.

achieve.

The West Middlesex Fair, held last week was somewhat spoiled by bad weather, but the attendance was good and the exhibits very creditable. The Shorthorn herds of Douglas Bros. and J. Morgan & Son' were on the grounds, and the state of the second was the second with the second was the second with the second was looked good enough to be seen anywhere.
A fine herd of Holsteins were shown by
W Bryan. A few good pens of Leicesters were exhibited by D. Graham, of ters were exhibited by D. Graham, of Thedford, who also had out a few first class Berkshire hogs. The draught horses were strong in numbers, and good in quality. A noticeable feature of the Fair was the one exhibits of grain, roots and cereals, fruit and vegetables.

Mr. J. Brydon, of Milverton, Ont., is in e Shorthorn business, and in it to stay He has to show the casual visitor to his place a fine herd of animals of splendid place a fine herd of animals of splendid type and finest breeding. Mr. Brydon's herd uniformly show the deep, blocky con-formation that is so highly approved of by the best breeders, and comprises animals of this type, with pedigrees showing the best strains of Strathallan, Symonds having for their grandsire Barmpton Hero, Miss Ramsdens and and Lustres. They are a fine lot of deep-fleshed, approved beef type.

The Milverton Fair was held on Sept. 23rd-24th and for number and quality of live stock exhibits is certainly one that leads most of the local fairs in Ontario. A large number of pure bred cattle, sheep, and swine, were on the grounds, that would do credit to the large exhibitions of the province. The heavy draught horses were as fine as are to be seen a where and the competition here and in the lighter classes as well was very keen.
Shorthorn cattle from the herds of Hastings Bros., Crosshill, W. Fleming, A. Hill, and others, were as fine as were to be seen at London or Toronto. The herd of A. Hill was the winner of the prize for aged bull and he was good enough to show anywhere. The winner of second place was the herd bull of W. Fleming. Match less Wonder is also an animal of good proportion, and finest breeding, his dam proportion, and finest breeding, his dam being by the well-limown pineapple bull Royal Wonder and he has for sire the famous Village Archer. Hastings Bros. exhibit, King Edward, also shown at Toronto, though not in first class show conditions, was an animal that attracted a conditions was an expension of the conditions of the conditio great deal of attention, being of fine proportion and quality, and a good, deep, strong animal. In horses, strong classes were shown, especially among the heavy draughts. In draught mares with foal, Dickson Bros. imp. mare Beauty easily took first place, and their other exhibit took first place, and their other exhibit in this class, a fine, blocky mare, with an excellent foal at her side, also captured second. Handsome driving horses filled the light-horse classes. Good pens of second. Handsome driving torses filled the light-horse classes. Good pens of sheep were shown by Hastings Bros., Cowan, and others. Fair representatives of the bacon hog, the Vorkshire, were to be seen, though the prize for aged boar be seen, though the prize for aged boar in this class was given to an animal of a rather thick short type, rather favoring a Chester White conformation. The exhibit in poultry was also very creditable and the centre of a great deal of interest.

The "World Man on the Wing" would like to meet all his friends at the big. Shorthorn sale at Whitby on October 14th.

snorthorn sale at writty on October 14th, where most of the lovers of the Scotch-topped beefmakers will find something that they would like to take home with them. There will be some pretty spirited fights for possession in a good many cases, but at a sale where so much is offered there is sure to come times when offered there is sure to come times when the bidding even for choice animals will be slow. Anyway, a good lunch will be pro-vided at the hotel by Mr. Bright, the Thanksgiving excursion rates will be on

and make the trip to Whitby cheap, and no one who pretends to be a Shorthorn no one who pretends to be a Shorthorn breeder can afford to stay away, anyhow.

Care of the Dairy Herd

Much has been said and written about attorn has been said and written about the care of the dairy herd, but the follow-ing, by an American dairyman, gives in concise form the important points to be looked after in maintaining a dairy herd:

- The bull is half the herd. Raise the calves from your best cows.
- Sell or fatten all your poor cows.
 Keep your herds in a healthy condi-

- 5. Feed and milk regularly.
 6. Feed only wholesome food and look carefully to the drinking water. Poor food and dirty water give taint milk and impair the health of the cow.
- Keep your calves growing.
 Don't feed warm milk one day and
- cold the next. 10. If you want a good dairy cow from your calf, get a good, long body with well-
- sprung ribs on your calf.

 11. The coat of an animal is a good indi-
- cation of its condition.

 12. Try to have some of your cows "come in" in fall and winter.
- 13. Try to raise all the feed for your herd. 14. Make the most out of skim milk
- 15. Dairying and hog raising are a good combination
