Young Sows and Boars from several litters just weaned. Herolds Farms, Beamsviller Ont, Niagara District.

CONSIDER THIS BULL CALF

## The Empire at Toronto

HE milking machine is a reality. A few years ago many dairymen were sceptical concerning the possibility of ever designing a machine which would successfully form the delicate operation of milking.

But inventive genius laughs at impossibilities. And after long and careful experimenting The Empire Milking Machine was perfected and completely solves the problem. The milk is drawn with the proper amount of vacuum and the teats are gently massaged after each spurt of milk is

Nature's milking machine, the calf, draws milk by suction, relieved every second or two by pressure from the tongue. He never squeezes the milk tongue. He never squeezes are miss out as the hand milker, lacking a suc-tion apparatus, is forced to do. The pressure he instinctively puts on the provision of nature. It presses back the blood which the suction would otherwise draw into the teat walls in such excess as to cause congestion.
The Empire Milking machine faithfully reproduces the calf's method,—
the sucking pull, then the pressure
that counteracts the effect of the suction on the teats. The perfect natural-ness of he Empire's action explains why it keeps the cow's teats and udder in better condition than does hand

Equally important is the improment in the quality of the milk itself, which is drawn from the cow and deposited in perfectly sealed air tight palls. No stable air, no dust or dirt comes in contact with the milk.

The Empire is not failing to attract great deal of attention at the exfibit of the Empire Cream Separator Co. under the Grand Stand. It may also be seen at Ottawa and London fairs. It is a machine that has proven itself in actual practice, in the dairy stables of the most prominent breeders and dairymen in Canada and the United States. Such men as G. S. Goodenham, G. A. Brethen, Manning W. Doherty, J. Alex. Wallace and many others with herds valued at thousands It is a machine that has proven of dollars, have proven the Empire a reliable machine, that can always be used on the best herd in the Dominion.

The Empire Cream Separator Co., of Canada, IAd., of Montreal, will gladly send their booklet to any interested dairyman.
