

### THE CANADIAN NATIONAL EXHIBITION.

One of the leading attractions at the Canadian National Exhibition in Toronto since its inception, has been the Process Building, in which are shown a score and more of producing industries in actual operation. Among other manufactures shown this year will be a complete demonstration of the manufacture of pure food, illustrations of the various forms of textile manufacture, complete beet and shoe making, manufacture of Canadian tweeds and other cloths, spring beds and other articles of domestic use, silk weaving, printing, lithographing with the latest presses and machines, type-setting, binder twine making, and so on, making, undoubtedly, one of the most interesting attractions ever offered at any exhibition, as well as one of the most instructive. The exhibition will this year be held from August 26th to September 11th.
