The Nova Scotia Government have taken steps whereby all bridges and roads in the province will hereafter be under direct supervision of the Provincial Government. A new department is to be created to be known as the Road and Bridge Department, at the head of which will be a competent engineer who will be held responsible for all expenditures on roads and bridges. Each county will have one or more inspectors, who will in turn be responsible to the Road and Bridge Department for all roads and bridges in the county. It is thought this new policy will be a decided improvement over the present system.
