

Pease

"ECONOMY" 700 SERIES

FURNACE

Pays for itself by the Coal it saves

MANY NEW FEATURES

For 36 years the Pease Furnace has led in Furnace construction, but our new "700 Series" Furnace is even an "improvement on the best."

The heat radiator is now constructed of **Copper Bearing steel** that enables it to resist the corrosive action of gases, and makes a "Pease" furnace last from two to three times as long as those in which just ordinary steel is used.

The large clean-out doors enable one to clean out the furnace in a few minutes—at any time, whether the fire is going or not.

Provision is made for installing a **Domestic Water Heater** that can be put in this new Pease Furnace at any time without taking the furnace apart or drilling holes. The Domestic Water Heater provides hot water for the house, heated by the furnace rather than by the kitchen range.

The new **fire-pot** is a vast improvement over the ordinary kind, and is built in two sections to insure long wear and to provide against all dangers of cracking. It is so shaped, as to get 50% more efficiency out of the fire.

This furnace has more air space between the Dome and the outer casing than any other furnace. This makes it possible to supply a large quantity of moderately warm air instead of a small quantity of parched hot air.

This new Pease furnace will give the greatest amount of heat at the smallest cost of upkeep. Truly "IT PAYS FOR ITSELF BY THE COAL IT SAVES."

This winter particularly the month of February, has been a great advertisement for Pease furnaces. They give a summer temperature in zero weather. Instal your new furnace as early as possible this summer. Let us give you quotations and advice. We have a special department of heating experts which will be glad to advise you without any cost or obligation whatever. But don't put it off till the last minute—do it early so as to get a proper installation. Write us to-day for our free booklet, or see our local Agents.

PEASE FOUNDRY COMPANY, LIMITED TORONTO, ONT.

Works: Brampton, Ont.

A Word of Advice

Instal a Pease Economy Furnace as soon as you possibly can this Spring.

By doing this you will insure proper installation. If you wait till late summer or fall all the furnace men being rushed to death, are apt to skimp the work through lack of time. Following this advice will probably save you many dollars.

You insure against fire—Why not against decay?

There is a small chance that your buildings will be burned, but there is an absolute certainty that they will decay if you neglect to keep them well protected by good paint.

Protection depends upon the character of the paint you use. Some paint permits moisture to go through to the wood, which starts decay and soon ruins the building. The paint that gives complete protection is

Low Brothers
High Standard LIQUID PAINT

It adheres tightly and sets in a tough, durable coat that resists moisture and wears for years. It is the one paint that years of outdoor tests have proved will insure greatest protection of your buildings.

Ask your local "High Standard" dealer-agent to give you Paint Information and color combinations for exterior, interior walls, floors, woodwork, etc.

Valuable Books FREE

Have the best looking house in your neighborhood. Our booklets will tell you how—"Homes Attractive From Gable to Garret," and "Guide to Farm Painting." Sent Free to readers of this paper. Write today.
