The discovery has now been made that Mr. Sherman's son married a Catholic. and we suppose this will be a black mark against the father in his race for political preferment. Not a whit beaind the crazed bigots of the American republic are our own Canadian Orangenen. A press despatch to the London ee Press on July 3rd tells us that the Orangemen of West Toronto have orwarded a statement to the Board of Education of that city, protesting against the appointment of Roman Catholic teachers on the public school staff. Some time ago it was discovered that one teacher, a Catholic girl, was employed by the Board in some minor osition, and one member of the Board of Education, a very low type of Orangeman, moved a resolution that she be dismissed because of her religion. and breadth and depth. Be they all, To the credit of the Board be it said, this unlovely citizen could not get a seconder for his resolution. Making reference to this transaction, the Orangemen of West Toronto, in solemn conclave assembled, wishes to place upon record, in Tooley street tailor

Dr. Sproule, M. P., Grand Sovereign of the Orange Association of British North America, has to say upon this incident. Here we have the great Orange Association, comprising, we are told, hundreds of thousands of stalwart defenders of the faith, the champions of civil and religious liberty, denouncing the Board of Education of Toronto because they did not dismiss from their service one of their teachers because she was a Catholic. Dr. Sproule and his army deserve, and will receive, but the contempt of all true Canadians.

In many regards it would appear as if the Catholics of Ireland were brought into existence to be hewers of wood and drawers of water for their non-Catholic neighbors.

Figures given by the New Ireland Review illustrate the anti - Catholic bigotry that seems to prevail in the management of the Bank of Ireland. There are 15 directors of the bank. Of these 12 are Protestants, 3 only are Catholics ; by law 3 must be Catholics. In the head office there are 21 chief officials, with salaries amounting to £12,000 per annum. Of these, 20 are Protestants, who receive in annual salaries about £11,625; 1 is a Catholic,

to 10 Catholic agents (managers). The Protestant agents receive in salaries about £22,750; the Catholics about

£3,225. In the same country branches there are 55 Protestant to 12 Catholic sub-agents. Among the humbler servants of the bank themselves there is the same singular disparity of numbers between Protestants and Catholics. Strange that such an institution should be called the Bank "of Ireland "-a country three fourths of the population of which are Catholics. But the disestablished Protestant church in that country calls itself the "Church of Ireland." Apparently those Protestants both of bank and church regard themselves, though a small minority. as the only element of the population worth taking into account. That is a

ascendancy in Ireland. SPIRIT AND MATTER.

Returning to the subject of Chris tian Science we propose to examine one of their fundamental theories. This theory is not categorically stated, though it practically assumes the denial of all matter. It does deny that we have bodies. Now such a negation must include all material things. The universe fades away, and dull earth He cannot allow any malignant mind to withdraws not into thin air but into control, deceive and injure mankind. the dreamy abyss of fanciful illusion. If any material thing has any reality it death-blow of an enemy and His light is surely the body with which the soul is in direct and immediate relation. Is it an intellectual act by which the individual Ego reasons the existence of eyes and ears, and parts which are neither identical with one another or with the whole ? And if it is an in tellectual judgment, strong in its premises and exacting in its conclusion, where is the mind's starting point, the foundation upon which so tremendous an edifice is erected ? It is not the result of judgment. It is simple apprehension. We are face to face with the reality of the body. Our reason dawned with the body's substantial shadow upon us, concealing many things, yet like the stars of night at the cause. Logic, psychology and revealing world upon world, and opening up the unmeasured lines of material existence and activity. We are in imprinciple or method. Anything which mediate communication with this material thing which we call body. Its promises relief to suffering, however existence cannot with consistency be denied, any more than its influence not the spirit, nor is it the result of the spirit's activity. Our soul could no more imagine the complicated machine in which and through which its thought and will devise and determine the marvels of ingenuity, than it could create the external world itself Without a body to start with, the soul could not think a body, by reason of the radical difference of their nature. The soul is simple, spiritual, immortal. By no possibility of its own active powers, without preceding material, could it frame a helpmate whose intimate relations would be inseparable from it, whose dual organs would contribute so largely to the unity of human nature and the treasury of human thought. One and one all. Two eyes form but one vision. Is it an illusion that we have two eyes, or that we have any eyes ? " Man's real and only body is not matter nor subject to gun-shot wounds ; nor are the objects in the universe 'delusions.' They are very real and true objects. but we apprehend them falsely as matnotes the doctrine of Christian Science upon the body. We therefore have eyes, but they are deceptive. These eyes are not material, though they afford us a false apprehension. How can the senses deceive ? If they deceive, by what standard will the Christian Scientist determine the

senses work. Not simple or spiritual, still less immortal, yet contributing material for the soul's activity. The reality may not be denied, but the materiality is what Christian Science denies. Nor would it attempt denial were it not for disease. As long as the senses work normally no question need be asked. All is peace, harmony, action. Disease calls in the strong arm of spiritual law and power over body. Think that your leg is not broken, that you have no leg to be broken-your whole body being an illusion, how are things to be righted ? Even if the leg is an illusion, the broken form is a new modification, and a decidedly inconvenient one. Get the illusion back to the old form, or, in p'ain language, have the broken bone set. Show faith in God and common sense in conduct. Believe that the bone is set, that its parts are knitting together, or that the whole thing is a delusion, the work of a malignant enemy. It could not be a friend who suggested that the bone was broken. Why or how does the illusion of disease or accident take place at all ? If the body in its normal condition is a decep tion, by what cause is it disturbed from this satisfactory state? If the body is the result of the mind's delusion, the broken bone must also be attributed to some mind. To whose mind ? Not to the individual whose bone is supposed to be broken. To some malignant mind? This will leave mankind the sport of an evil spirit. This cannot be admitted even on the shallow reasoning of Christian Science. The evil spirit in question is either created or uncreated. If uncreated it is equal to God, so that we have two eternal principles, one of good, the other of evil. Evil cannot be a first principle, for evil is negative, or, mora more strictly speaking, privative. God, says Christian Science-and it is about the only point in which we agree with this effeminate novelty-God is love. Now God may allow disease, bu, He is ever at hand to ward off the

There are, however, a few who, not having bowed the knee to Baal, have hopes of a union clasping in its embrace of truth and charity all Christians from the distant East to the colden West, and taking in the islands of the seas. We admire these men for their bopeful courage and their ideal desires. May they see their hopes fulfilled - and union setting in with full sail to the one harbor. " It is the Holy Ghost, " says The Lamp, the Anglo-R man monthly, "Who inspires us to pray, and this universal preparation of prayer is the certain forerunner of spiritual action, that what has been conceived of the Holy Ghost in the hearts of Chris tian believers may in the fulness of time be brought forth as material. visible and actual unity." The Lump looks at the task from an Anglican point of view. That is too narrow. Let the horizon expand and the heart be enlarged. Farther away stand the Evangelicals - talking about Church Union yet not comprehending its height and millions more, sitting still in the ancient superstition of the Gentilesbe they all in our prayers for the Union of faith, that their may be but one fold and one Shepherd. The Lamp does include all in the expectation of leading all. Seeking that corporate union which for three hundred years has been scorned and rejected, though well intentioned these wise men of the East seem hardly to follow the Star. They are waiting to bring their whole kingdom with them. It is not the way to treat the call. What is needed is, not to complicate or delay the problem, but to rise and move with simple promptitude and filial confidence. Church Unity from the stardpoint of the Anglican Church involves, says The Lamp, three diverse and difficult propositions : " (s) reconciliation with our ancient Mother, the Church of Rome ; (b) the establishment of intercommunion with the O: thodox Churches of the East, whose separation from England and the rest of the West dates from the eleventh century; and (c) a return of the scattered progeny of the Reformation is ever shining for us that we to the Apostolic fellowship, so that may follow it in simple submission. the Lutherans, Presbyterians, Baptists, It is a far worse act of a loving God to Congregationalists, Methodists and leave man under the hallucination that others who went out from Rome or he has a body than for Him to tolerate later from the Church of England shall disease arising often from the very materiality of the body. The unsatisfactory position of Anglicanism is impressing itself with greater force upon American Episcopalians every week.
