but actually there are only two kinds of cream separators—the De Laval and Others.

The De Laval is the original, and Others merely an imitation of past or present De Laval patents.

Every stage of separator improvement and development has been attained through De Laval inventions.

All cream separators made to-day, regardless of the names by which they are known, are built upon discarded or abandoned De Laval patents, and the best of them are scarcely equal to the De Laval machines of twelve years ago, while the advent of the

has immeasurably widened the gap

Imitation is the subtlest flattery but never equals the genuine, and every intending separator buyer owes it to himself to secure the free trial of a New Improved De Laval separator before purchasing any other.

## PURITY FLOUR

And Its Keeping Qualities

**S**OME people find it necessary to buy a considerable quantity of flour at one time—sufficient to last for a long period. Naturally they are anxious to procure a flour of the kind best adapted to lengthy storage.

There are two important reasons why PURITY FLOUR possesses these qualities. One is that it is made entirely from Manitoba Hard Wheat. The other lies in the fact that the careful milling necessary to produce "Purity" absolutely excludes all low-grade particles of the wheat berry. It's the high grade Manitoba Hard Wheat Flour that keeps—stands longest storage.

That's "Purity."

"Purity" flour may cost a little more, but is more than worth the difference. Try it. Watch results both for quality and yield.
