It is now generally admitted, by the learned and actentific, that the mysterious power called Galconison or Magnetism is in fact the principle of Vissility of Life, and that disease in many of its most pointful forms is entirely overing to the absence of this Galvanic or Magnetic power in its healthy proportions, If, then, we can readily supply this wondrous power, when it is libus deficient, we can successfully combat disease; and this has been fully and perfectly attained by this most wonderful selentific discovery, of combining Magnetism or Galvanism with a Fluid which has cost the inventor of this remedy years of

discovery, of combining Magnetism or Galvanism with a Fluid which has cent the inventor of this remedy years of study and labor.

There is not an intelligent Physician, who has kept pace with the progress of acience, that does not readily approve of the use of the Magnetic power in various diseases, and there is carcely a Medical Journal, either in this country or Europe, which makes its appearance, without the statement of various cases, showing some new effects of these wonderful agents, or corroborating previous experience of their beneficial use. The inventor of the Galvanie Embrecation has great pleasure in being able to state, that a majority of the most distinguished Physicians of New York constantly recommend this Embrecation in their practice, are approved and commendation.

REDUCED RATES OF PREMIUM—HALF CREDIT RATES OF PREMIUM. CREDIT RATES OF PREMIUM.

THE great and decided success which has attended this institution, has induced the Directors to REDUCE the RATES originally required in British North America, to the ordinary Ruropean Rates. The result of such Reduction is to enable parties to avail themselves of the important benefits to Life Assurance at much lower Rates of Premium than those of any other Assurance Company transacting business in Canada.

The Directors have also resolved to extend to British North America what was a suffered by the HALF CREDIT RATES of PREMIUM which have been so highly approved, and are so generally adopted by Policy Holders in the United Kingdom. The most liberal conditions are likewise offered to the Assured in the limits to which they may proceed by sea or land, to other parts of North America without affecting their Interest in their respective Policies. heir respective Policies.
