PARIS SOLDIER
HOME FROM FRONTPte. Alf. Laughlin Severely
Wounded, Had Many
Adventures.

Paris, Nov. 18.—(From our own
correspondent)—The Sons of Eng-
land held a most successful supper
and entertainment, Wednesday night
in the Maple Leaf Club rooms. There
was a very large gathering and about
sixty dollars realized, of which
amount, a large donation was given
to the Maple Leaf Patriotic Club, and
the balance will be used by the S.
O. E. also for patriotic purposes.
During the evening the following pro-
gramme was rendered, the chair be-
ing taken by Mr. J. H. Fisher, M.P.
Duett—Corpl. F. Oldham and Geo.
Foster.

Short Address—Dr. Lovett.
Song—T. Soutar.
Address—Rev. B. B. Williams.
Song—Jno. McCammon.
Address—Scott Davidson.
Song—Geo. Foster.
Song—Mrs. W. Bomrose.
Song—E. V. Kinser.
Song—F. Blackhurst.
Song—T. Southworth.
Song—Geo. Foster.

Chap. McKegney of the 215th gave
one of the best recruiting addresses
which has ever been heard in Paris,
on the above occasion, and was much
appreciated.

Won Prizes
Mr. Wm. Howard, Walnut St., was
very successful at the Galt Winter
Poultry Show, in single comb white
Leghorns, obtaining several prizes,
also five special prizes, two silver
cups and sweetstakes. Before leav-
ing Mr. Howard sold one bird for
\$40.00.

Home From Front.

Pte. Alf. Laughlin, familiarly

known as "Happy Alf," has returned

from the front and spending a few

days in town, renewing old ac-

quaintances. Private Laughlin was

formally employed by the Winery

Mill Co., and at the outbreak of

war enlisted with the Grenadiers

being afterwards transferred to the

48th Highlanders. He has returned

minus his left leg, right arm and 3

fingers of his left hand besides

some forty or more wounds receiv-

ed from shrapnel. It was Pte. Mc-

Laughlin who, when his right arm

had been shot off by a shell, picked

up the member and started to walk

back with it under his remaining

arm, lest the Germans would get it.

He had not gone far before another

leg, and while on the ground, an-

other shell, bursting near, took off

his fingers. When he did finally

reach the dressing station he was

found to have 55 wounds. He is one
of the most seriously wounded sol-
diers who has returned from the
front, but is still happy and only
sorry he couldn't stay to the finish.

Wounded
Mrs. Sharp received word on
Thursday that her husband, Pte.
Horace Sharp, had been severely
wounded in the back, and was now
in hospital in France.

Obituary
The death took place at his resi-
dence in Glenholme Tp., after a three
weeks' illness, from pneumonia, of
Mr. John B. Smith, in the 62nd year
of his age. Deceased is survived by
three daughters and one son, his
wife having predeceased him some
three years ago. The funeral took
place this afternoon to Paris ceme-
tery.

YOUR SICK CHILD
IS CONSTIPATED!
LOOK AT TONGUE

No matter what ails your child, a
gentle, thorough laxative should al-
ways be the first treatment given.
If your little one is out-of-sorts,
half-sick, isn't resting, eating and
acting naturally—look. Mothers!
see if tongue is coated. This is a
sure sign that it's little stomach,
liver and bowels are clogged with
waste. When cross, irritable, fever-
ish, stomach sour, breath bad or has
stomach-ache, diarrhoea, sore throat,
febrile, obtain a gentle laxative.
"California Syrup of Figs," and in a
few hours all the constipated poison
undigested food and sour bile gently
moves out of its little bowels without
gripping, and you have a well, play-
ful child again.

Mothers can rest easy after giving
this harmless "fruit laxative," be-
cause it never fails to cleanse the
little one's liver and bowels, and
sweeten the stomach and they dearly
love its pleasant taste. Full particu-
lars for babies, children of all
ages and for grown-ups printed on
each bottle.

Beware of counterfeit fig syrups.
Ask your druggist for a 50 cent
bottle of "California Syrup of Figs"
and you will be satisfied.

Military authorities at El Paso,
Texas, hear that five Americans in
Parral were slain when Villa occupied
Parral on November 1.

Miss Grace Teiper will be a witness
at the trial of her brother, John Ed-
ward Teiper, in Buffalo, on a charge
of murdering his mother.

HOW TO KEEP WELL

BY JOHN W. S. McOULLOUGH, M.D., D.P.H., CHIEF OFFICER
OF THE PROVINCIAL BOARD OF HEALTH.

PREVENTION OF DISEASE.

EXPERIENCE in the control of infectious diseases brings very forcibly
to one's mind that the present methods of preventing the spread of
these diseases are of doubtful value. What is the ordinary pro-
cedure say in a town of 2,000 or 5,000 population? Scarlet fever
for example is discovered, the physician in attendance notifies the health
officer, and a placard is placed on the house for six weeks, notifying the
public that none are allowed to enter the home but members of the family
during that time. These directions, if followed, limit this focus of in-
fection.

Down the street a few doors Mrs. Brown's little girl, eight years old, is
a little under the weather, vomits once or twice and has a slight scarlet
rash on her body with a little fever, but is not very sick. It may be that
the young doctor, who is called in, regards the case as one of indigestion,
prescribes a laxative and sees the case no more; or perhaps suspecting
scarlet fever, he covertly or at the instance of the child's mother, who
doesn't want her house placarded, fails to notify the case to the Medical
Officer of Health. Consequently after a few days Mary goes back to school
and no more is thought of it. Mary, however, fails to pick up as she
should. She is pale, flabby looking, and complains of headache. The
mother finds she does not eat her meals, and on Saturday night while
superintending her bath she notices that Mary's feet are a little swollen
and her eyes look puffy. The mother is alarmed, and finding the family
doctor out of town another one is called. He finds on examination of the
urine that the child has nephritis or inflammation of the kidneys, and
Mary is sent to bed. She is seriously ill for several weeks. She gets well
for the time but her kidneys are malmed for life.

By this time there is a general outbreak of scarlet fever all over the
town. Everyone is alarmed. The public schools are closed. The local
board of health and the medical officer of health take stringent measures,
but despite their efforts the number of cases grow. The outbreak lasts
most of the winter, spreading to the adjacent townships and villages. It
seems to wear itself out towards spring, returning again after the lapse
of a year or two to carry on in the same way. Several fine children have
died of the disease during the winter, and several mothers of families are
left with aching hearts and the outer semblance of mourning for their
little ones. Others have had somewhat the experience of Mary's mother.

But let us follow Mary a little further. Ten or twelve years have
passed, and she has grown to be a fine young woman. She is courted and
married by one of the best young men in an adjacent town. She is loved
and happy. Her husband has provided a pretty home, and her mother
and father are rejoiced to see that she has bright prospects before her. After
a few months she writes her mother that she is not feeling well, that she
is sick in the mornings, vomits a good deal and has headaches. To the
mother this is not unusual. Her daughter is pregnant. Most of women
have these little troubles when in this condition. But she is not improv-
ing and the mother is shocked when she visits her to find Mary with puffy
swollen face and legs. The doctor must be called at once. He promises to
call in the morning, but during the night Mary has some sort of a fit and
becomes unconscious. The doctor comes hurriedly. He finds the patient
has eclampsia. There is a consultation. A necessary operation is decided
upon, but in spite of the efforts of two or three of the best doctors of the
neighborhood and of a specialist from a nearby city, the poor young
woman dies. What a tragedy! It is not an uncommon occurrence.
It dates back to the neglected case of scarlet fever in the little school
girl. The neglect has had far-reaching consequences. Every neighborhood
has had such cases. Every physician is familiar with them.

Mild cases of scarlet fever are often more dangerous than severe
ones. The mild cases fail to receive the careful attention which would pre-
vent the disastrous consequences just outlined. These mild cases,
because they are not controlled, spread the contagion far and wide. The
same is true to some extent of all other contagious diseases. It is playing
with public health and with human life, health, and happiness to deal with
the most important aspect of the people, good health, in such a fashion.
How can it be checked? By education; people must learn that the best and
most satisfactory way to deal with these contagious diseases is to be frank
about them. The slightest suspicion of scarlet fever in a family would
suffice to have the Medical Officer of Health notified and the case prevented
from doing any harm to others. If Mary's case had been regarded with
due weight and received proper treatment she would not have been a
happy wife and mother, but alas! her foolish mother and reckless doctor
sealed her fate.

To Popularize Sheep Raising.

A scheme for popularizing sheep
breeding in counties of the Province
of Ontario is being promoted by the
Agricultural Department. The plan
is to take five counties, the names
of which have not been selected yet,
and applications will be received
from each of these counties from
farmers' sons and others who have
taken one of the short courses under
district representatives. In each
county a competition will be held in
sheep judging, and the boy who
makes the best record and whose fa-
ther is not now raising sheep, and
who conforms to the conditions, will
be given a flock of six ewes. He has
to agree to keep records of the cost
and other things. The ewes become
the property of the lady for two
years. At the end of two years from
the time that they took them over
they turn back to the Live Stock
Branch two shearing ewes, at the
end of the third year two more, and
at the end of the fourth year other
two. By this period the boys will
have given back six shearing ewes.
In addition to this the Live Stock
Branch is supplying pure-bred rams,
and it is estimated that at the end of
a year these young farmers should
get six lambs. It is probable that in
time the scheme may be extended to
more than five counties.

Guelph's Loss by War.
The extent to which recruiting
has been carried on in Guelph is well
reflected in the returns from the As-
sessment Department, which were
handed out recently. Assessor Hat-
lings places the population of the city
at 36,922, a decrease from the pre-
vious year of 713. A large number
of soldiers' wives and families have
returned to the old country until
after the war. The total assessment
is \$11,419,930, an increase of more
than \$200,000. The city loses the
business tax from the hotels of the
city, which was included in the esti-
mate at the start of the year. This
amounts to \$1,500. Only one ward
in the city shows an increase in
population.

The Lost Art.
The four-year-old had just been
reproved at the table. He continued
to talk cheerfully, though uninter-
ested, to father. After some minutes
of soliloquy he turned to mother
and remarked:
"Your husband doesn't talk very
much this noon, does he, mother?"

Don't think because you have taken many
remedies that your case is incurable.
Hood's Sarsaparilla has cured many seem-
ingly hopeless cases of eczema, catarrh,
rheumatism, kidney complaint, dyspepsia
and general debility. Take Hood's.

Household Hints.

Lemon-juice makes a good substi-
tute for shoe polish if a few drops
are well rubbed into the leather.

If copper pans are not very care-
fully washed there is danger that
they may poison the food cooked in
them.

When making mint sauce, add a
little brown granulated sugar to the
mint and the chopping will be much
easier, and accomplished more quick-
ly too.

Short crops and large exports of
foodstuffs are placed by retail gro-
cers as the principal contributing
causes of high prices.

Catarrh Cannot be Cured

with LOCAL APPLICATIONS, as they
cannot reach the seat of the disease. Ca-
tarrh remedies. Hall's Catarrh Cure is
taken internally, and acts directly upon
tissue in a moist or catarrhal disease,
and in order to cure it you must take in-
to the blood and mucous surfaces. Hall's Ca-
tarrh Cure is not a quick medicine. It
was prescribed by one of the best phy-
sicians in the country for years and is a
regular prescription. It is composed of
the best tonics known, combined with the
best blood purifiers, acting directly on the
mucous surfaces. The perfect combi-
nation of the two ingredients is what pro-
duces such wonderful results in curing
catarrh. Send for testimonials, free.
Take Hall's Family Pills for constipa-
tion.

J. C. HALL & CO., Props. Toledo, O.

Records it breaks are at speeds you can use

A king's ransom would not
more handsomely reward
persistence than does the
new Willys Six.
Never before has any six of
its size performed in ordi-
nary driving to equal the
new Willys Six.
High-speed motors may de-
velop greater power at
racing speeds.
But we sought to develop
greater power at driving
speeds.
And the Willys-Six proves
conclusively that it was
still possible to further im-
prove six cylinder perfor-
mance in the usable speeds.

What we have attained in the
new Willys Six compared
with any other six of its
size is
—higher power at speeds be-
low 25 miles per hour
—faster pick-up at speeds be-
low 25 miles per hour
—smoother climbing at speeds
below 25 miles per hour
—slower speed on direct drive
with absolute smoothness.
And we have attained all this
and still have mile-a-minute
speed and all the power at
speeds above 25 miles per
hour that you would ever
need or use, and all this

without sacrifice of sturdi-
ness, without increasing
fuel consumption.
These are motor qualities
which you can use in
every-day driving.
And these are the very qual-
ities which the excessive
speed motor sacrifices at
low speeds in order to gain
them at speeds no ordinary
driver ever uses—and with
a loss in sturdiness and
fuel economy.
And if you use the mile-a-
minute speed of the Willys-
Six you will find that it
tugs the road while cars of
the excessive r. p. m. type

at the same high speed be-
come unsteady.
But epoch making as are
these motor improvements
there are other ways in
which the Willys Six sur-
passes.
In riding comfort the new
Willys Six sets a new pace
for luxury.
It has low, deep-cushioned
seats with improved seat
springs.
It has long cantilever rear
springs in exact accord with
the weight of the car.
And the long wheelbase (125
inches) and large tires (35

x 4 1/2 inches) also contrib-
ute to a new luxury of rid-
ing comfort.
In appearance also, the Willys
Six, with its smart, double
cowl body design, teaches
perfection of beauty.
Only a past master of body
design could reveal rugged
power and speed in lines of
such grace and beauty.
At the price, \$1855, this big
seven-passenger Willys Six
is a new smashing value in
the luxurious class.
Don't waste a minute, but
get right in touch with us
and let us show you the
new Willys Six at once.
