

Calendar for March, 1906.

Calendar for March, 1906. Table with columns for Day of Week, Sun Rises, Sun Sets, Moon Rises, Moon Sets, High Water, and Low Water. Includes dates from 1st to 31st.

Get the Most Out of Your Food

You don't and can't if your stomach is weak. A weak stomach does not digest all that is ordinarily taken into it. It gets tired easily, and what it fails to digest is wasted.

Among the signs of a weak stomach are uneasiness after eating, fits of nervous headache, and disagreeable belching. "I have been troubled with dyspepsia for years, and tried every remedy I heard of, but never got anything that gave me relief until I took Hood's Sarsaparilla. I cannot praise this medicine too highly for the good it has done me. I always take it in the spring and fall and would not be without it." W. A. Newarr, Belleville, Ont.

Hood's Sarsaparilla

Strengthens and tones the stomach and the whole digestive system.

Lord Justice Fitzgibbon, a Protestant, said:

"Speaking with all reverence of a faith which I do not hold, touching the mystery of Godliness, I could not impute to any individual professing the Roman Catholic religion that he regarded a gift of money for Masses as a means of securing a private and exclusive benefit for himself alone from such a sacrifice as being much, if at all, short of blasphemous, and as I understand the proved doctrine of the Church, it would certainly be heresy."

Lord Justice Holmes, also a Protestant, said:

"If I were obliged to arrive at a judicial conclusion as to whether the public celebration of the Mass confers a public benefit on those who hear it, I must consider the doctrine that is embodied in the rite. I might adopt the declaration of the Council of Trent regarding the sacrifice of the Mass, or I might adopt the strong language of the thirty-first Article of Religion in the English Book of Common Prayer. In the one case it would necessarily follow that the celebration, whether in public or private, would confer a public benefit; in the other case it would just as necessarily follow that no such benefit is possible. No court of justice in this country can be called on to decide such a question as this. What we can determine with certainty is this, that it is part of the creed of the most ancient Church in Western Christendom, of which the testator was a member, that the Mass is a true sacrifice offered to God by the priest in the name of the Church whose minister he is; that every Mass, whether public or private, is believed to bring down blessings to the world, and that all the faithful, present or absent, alive or dead, participate in those blessings. Now, if this be true, there can, I think, be no doubt that a bequest for the purpose of having private Masses celebrated would be charitable, and a temporal court in Ireland, having no authority to decide for itself whether it is true or not, must take as its guide the belief of the Church of which the testator is a member. I understand this to be the law, and on this ground I incur in holding that the appeal ought to be allowed."

Writing in a recent issue of the Catholic Times of Liverpool, J. C. McWalter, M. D., says:

In the Fitzpatrick lectures delivered at the Royal College of Physicians in London, Dr. Norman Moore made the following reference to a famous Cardinal: "Nicholas of Cusa was a man of varied learning and of a scientific habit of mind. He was a theologian writer, a mathematician, and an observer of natural phenomena. He made an original examination of the Koran and critically discussed its contents, and in medicine he introduced an improvement which in an altered form has continued in use to this day. This improvement was the counting of the pulse, which up to his time had been felt and discussed in many ways but never counted. The first method of a new invention is often unnecessarily cumbersome, but this does not detract from the merit of the man who first discerns its principle. Nicholas of Cusa proposed to compare the rate of pulses by weighing the quantity of water run out of a water clock while the pulse beat 100 times. Thus, he said, you may easily prove the degree in which the pulse of a young man is more rapid than that of an old man. "The weight, therefore, of water that flows out in relation to the different pulses in the youth, in the aged man, in the healthy and the sick ought necessarily to lead to a truer knowledge of the disease, one weight being proper to the one infirmity and a different weight to another." "The manufacture of watches with second hands has since given us a simpler method of counting, but the method of introducing this useful kind of observation into clinical medicine belongs to Nicholas of Cusa. He is buried in the church from which he took his title, St. Peter at Vinona. Devotion attracts many people to this church, and a love of art, since it contains a great work of Michael Angelo, many others, and science adds a third interest in the monument of this improver of clinical medicine. His tomb has no ornament but its inscription; yet it is not improper to consider that he has a more lasting memorial in his commemoration over the whole globe wherever medicine is practised by the simple clinical method of observation which he was the first to complete."

In Maine and in Brittany

As a striking contrast to the charges of looting shipwrecked vessels which Mr. Wasson alleges against certain Maine coast dwellers, in his book, "The Green Shy," let us consider the wreck some months ago of the British steamer St. Hilda in sight of St. Malo in Brittany, and the conduct of the Catholic Bretons toward the ill-fated vessel and its unfortunate sailors and passengers. The New Zealand Tablet thus tells the story: "There were one hundred and thirty-four persons on board when the vessel struck. When daylight came six of them were rescued, frozen almost to death. The remainder had their souls battered out against the cruel rocks. Most of the victims were the pious Breton Catholic peasants who cross to England with the produce of their little onion-farms in the late summer and early autumn of every year. 'They are,' says a sympathetic writer in an English paper, 'among the most desirable of aliens, and from Bristol to Hastings and Dover one may see, with their cleanly and sweetly-olad women-folk, going on Sunday to the Catholic Church. The Breton onion-seller who has come into contact with the police,' he adds, 'would take a deal of looking for.' The human freight on the ill-fated 'Hilda' compressed into those last forsaken minutes enough of life to make the youngest of them feel the touch of age. Yet there was no panic. The passing of the vessel was lighted up by a quiet heroism that would convert a cynic—even a youthful one. The Breton onion-sellers busied themselves, along with the two devoted stewardesses, in fastening life-belts around the woman and children. Then they quietly and prayerfully waited for the end. For most of them it came speedily amidst "The tramping surf On the rocks and the hard sea-sand." "When daylight came, gallant fellows risked their lives among the jagged black rocks and the toasting white waters to rescue the little handful of survivors. 'The behavior of the Bretons,' says the Christchurch Press, 'in searching for the bodies of the victims and caring for them when found was beyond praise, and correspondents note that although there were rings on the dead women's fingers, bank-notes in the pockets of the men, and thousands of pounds worth of gold in the belts of the drowned onion-sellers, nothing was touched. 'No thanks are due,' was the reply of a parish priest to a correspondent who spoke of the delicacy and extreme kindness of the people. 'We have done what was meet for people who are our friends.'"—S. H. Review.

Cardinal First Proposed Counting the Pulse.

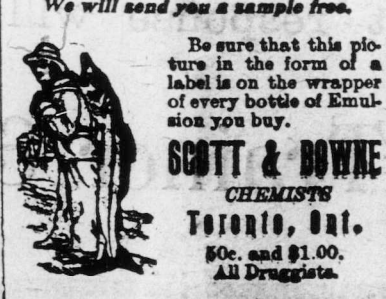

Writing in a recent issue of the Catholic Times of Liverpool, J. C. McWalter, M. D., says: In the Fitzpatrick lectures delivered at the Royal College of Physicians in London, Dr. Norman Moore made the following reference to a famous Cardinal: "Nicholas of Cusa was a man of varied learning and of a scientific habit of mind. He was a theologian writer, a mathematician, and an observer of natural phenomena. He made an original examination of the Koran and critically discussed its contents, and in medicine he introduced an improvement which in an altered form has continued in use to this day. This improvement was the counting of the pulse, which up to his time had been felt and discussed in many ways but never counted. The first method of a new invention is often unnecessarily cumbersome, but this does not detract from the merit of the man who first discerns its principle. Nicholas of Cusa proposed to compare the rate of pulses by weighing the quantity of water run out of a water clock while the pulse beat 100 times. Thus, he said, you may easily prove the degree in which the pulse of a young man is more rapid than that of an old man. "The weight, therefore, of water that flows out in relation to the different pulses in the youth, in the aged man, in the healthy and the sick ought necessarily to lead to a truer knowledge of the disease, one weight being proper to the one infirmity and a different weight to another." "The manufacture of watches with second hands has since given us a simpler method of counting, but the method of introducing this useful kind of observation into clinical medicine belongs to Nicholas of Cusa. He is buried in the church from which he took his title, St. Peter at Vinona. Devotion attracts many people to this church, and a love of art, since it contains a great work of Michael Angelo, many others, and science adds a third interest in the monument of this improver of clinical medicine. His tomb has no ornament but its inscription; yet it is not improper to consider that he has a more lasting memorial in his commemoration over the whole globe wherever medicine is practised by the simple clinical method of observation which he was the first to complete."

Impoverished Soil

Impoverished soil, like impoverished blood, needs a proper fertilizer. A chemist by analyzing the soil can tell you what fertilizer to use for different products. If your blood is impoverished your doctor will tell you what you need to fertilize it and give it the rich, red corpuscles that are lacking in it. It may be you need a tonic, but more likely you need a concentrated fat food, and fat is the element lacking in your system. There is no fat food that is so easily digested and assimilated as Scott's Emulsion of Cod Liver Oil. It will nourish and strengthen the body when milk and cream fail to do it. Scott's Emulsion is always the same; always palatable and always beneficial where the body is wasting from any cause, either in children or adults.

Scott's Emulsion of Cod Liver Oil

It will nourish and strengthen the body when milk and cream fail to do it. Scott's Emulsion is always the same; always palatable and always beneficial where the body is wasting from any cause, either in children or adults. We will send you a sample free. Be sure that this picture is in the form of a label on the wrapper of every bottle of Emulsion you buy. SCOTT & BOWNE, CHEMISTS, TORONTO, Ont. 50c. and \$1.00. All Druggists.

Fore Daddy'd go to Bed.

Each night for fifty years or more, 'Fore daddy'd go to bed, He'd come 'round tryin' every door, From front hall to the shed, And then he'd blow the candle out And set it on the bin, And by and by you'd hear him about: "Is everybody in." And if it happened one of us Young fellers still was out, He'd walk aroun' and fret and fuss And say he had no doubt That somethin' had befallen us Or we'd fall into sin, But when he'd hear our trampin' feet He'd say: "Thank God, you're in!" And now I reckon he's up thar, Awaitin' day by day, To bid us welcome from afar If we should go that way; But one thing's certain, he won't rest Until his kith and kin Have passed the portals of the blest And all are gathered in.

Important Decision on Bequests for Masses.

A decision just handed down by the Court of Appeal in Dublin, on the subject of bequests for Masses, settles satisfactorily what has hitherto been a great grievance to Irish Catholics. Hitherto such bequests were not regarded as charitable and valid unless there was an express or implied declaration that the Masses were to be said in public. Henceforth no declaration of the kind will be necessary, the Court of Appeal having decided that a bequest for Masses, whether directed to be publicly celebrated or not, must be taken as a pious or charitable use, and, as such, legally valid. The judgment was on an appeal by his Eminence Cardinal Logue against an order of the Master of the Rolls declaring that a gift under the will of the late Ellen McLoughlin, of Portadown, for Masses for the repose of the souls of her late husband, her children and herself was void, because there was no direction that the Masses should be celebrated in public. The court, which consisted of the Lord Chancellor, the Lord Chief Baron, Lord Justice Fitzgibbon and Lord Justice Holmes, unanimously reversed the judgment of the Master of the Rolls, and declared that the interpretation of the word "charitable" is to depend on the view of the particular church to which the testator belonged as to what may constitute a charity, and that, therefore, it was not necessary to specify that the Masses should be said in public, as it was a doctrine of the Roman Catholic Church that a mere naked bequest for Masses to be said for the repose of souls is "charitable."

Non-Catholics generally, and not a few Catholics, have very incorrect notions of the meaning of the offerings which are made to priests by members of the faithful who desire to have Masses said for a special intention. Highly interesting, therefore, are the speeches (which fill a page of the Dublin Freeman) made by the learned judges when giving their decision.

Lord Chief Baron Pallas, who is a Catholic, said in part:

"I do not consider the money to be a consideration for the celebration. In no period of the Christian Church would such a bargain be other than simoniacal. The true nature of the bequest was that of an alms to the clergyman, just as frankalmogone alms was in the nature of a gift; but the gift was accompanied by a request for the celebration, and the Church would not permit the clergyman to receive the benefit and disappoint the expectation, and it imposed upon his conscience the obligation to perform the service. The obligation, however, to his mind, was one to the Church, and not to the testator, and certainly was to be enforced only by the Church. The honorarium, then, was an alms and a recognized mode of supplementing the income of the clergyman, and was applicable to his support and maintenance too."

Lord Justice Fitzgibbon, a Protestant, said:

"Speaking with all reverence of a faith which I do not hold, touching the mystery of Godliness, I could not impute to any individual professing the Roman Catholic religion that he regarded a gift of money for Masses as a means of securing a private and exclusive benefit for himself alone from such a sacrifice as being much, if at all, short of blasphemous, and as I understand the proved doctrine of the Church, it would certainly be heresy."

Lord Justice Holmes, also a Protestant, said:

"If I were obliged to arrive at a judicial conclusion as to whether the public celebration of the Mass confers a public benefit on those who hear it, I must consider the doctrine that is embodied in the rite. I might adopt the declaration of the Council of Trent regarding the sacrifice of the Mass, or I might adopt the strong language of the thirty-first Article of Religion in the English Book of Common Prayer. In the one case it would necessarily follow that the celebration, whether in public or private, would confer a public benefit; in the other case it would just as necessarily follow that no such benefit is possible. No court of justice in this country can be called on to decide such a question as this. What we can determine with certainty is this, that it is part of the creed of the most ancient Church in Western Christendom, of which the testator was a member, that the Mass is a true sacrifice offered to God by the priest in the name of the Church whose minister he is; that every Mass, whether public or private, is believed to bring down blessings to the world, and that all the faithful, present or absent, alive or dead, participate in those blessings. Now, if this be true, there can, I think, be no doubt that a bequest for the purpose of having private Masses celebrated would be charitable, and a temporal court in Ireland, having no authority to decide for itself whether it is true or not, must take as its guide the belief of the Church of which the testator is a member. I understand this to be the law, and on this ground I incur in holding that the appeal ought to be allowed."

Writing in a recent issue of the Catholic Times of Liverpool, J. C. McWalter, M. D., says:

In the Fitzpatrick lectures delivered at the Royal College of Physicians in London, Dr. Norman Moore made the following reference to a famous Cardinal: "Nicholas of Cusa was a man of varied learning and of a scientific habit of mind. He was a theologian writer, a mathematician, and an observer of natural phenomena. He made an original examination of the Koran and critically discussed its contents, and in medicine he introduced an improvement which in an altered form has continued in use to this day. This improvement was the counting of the pulse, which up to his time had been felt and discussed in many ways but never counted. The first method of a new invention is often unnecessarily cumbersome, but this does not detract from the merit of the man who first discerns its principle. Nicholas of Cusa proposed to compare the rate of pulses by weighing the quantity of water run out of a water clock while the pulse beat 100 times. Thus, he said, you may easily prove the degree in which the pulse of a young man is more rapid than that of an old man. "The manufacture of watches with second hands has since given us a simpler method of counting, but the method of introducing this useful kind of observation into clinical medicine belongs to Nicholas of Cusa. He is buried in the church from which he took his title, St. Peter at Vinona. Devotion attracts many people to this church, and a love of art, since it contains a great work of Michael Angelo, many others, and science adds a third interest in the monument of this improver of clinical medicine. His tomb has no ornament but its inscription; yet it is not improper to consider that he has a more lasting memorial in his commemoration over the whole globe wherever medicine is practised by the simple clinical method of observation which he was the first to complete."

The Newman of Norway.

One of the most notable conversions to the Catholic Church in the present generation (though little has been heard of it in this country) and one destined to have a far-reaching influence on philosophical and theological thought in Northern Europe, has been that of Dr. K. Krogh Tønning, the celebrated pastor, writer and pulpit orator of Christiansia, As Lutheran rector of old Acker

Parish, in the capital of Norway, he won brilliant reputation, not only in his own country, but in Sweden, Denmark and Germany, being known not only as an eloquent preacher, but as a man of profound and varied learning. His great treatise on dogmatic theology, in five volumes, won a speedy place as the standard work on that subject throughout the Lutheran church, and it is probable that, since the conversion of John Henry Newman, just sixty years ago, no similar event has caused such commotion in Protestant circles as the news that Dr. Krogh-Tønning has been received into the Catholic Church by a Jesuit Father at Aarhus, in Denmark.

Writers in the religious press and the learned reviews of Northern Europe have endeavored to disguise the general dismay at the desertion of the Lutheran ranks by the most learned theologian of that church, by finding that in all his later dogmatic writings he has shown a marked tendency towards Catholicism, and that, in his final step he was only logically following out the principles which he had long before adopted as his own. This is very likely true, but it does not make his actual conversion a less noteworthy event.

Dr. Krogh-Tønning was long ago marked for advancement to a bishopric in the Norwegian Lutheran Church, and his loss to that body has been a very serious one. His theological works, published while he was a Protestant, are written in the German language, but he has brought out in Latin, since his conversion, a singularly beautiful treatise, as luminous as it is profound, on grace and free-will. The actual title of this work, which should be in the hands of every student of theology, is "De Gratia Christi et Libero Arbitrio," and it is published by Dybdov & Brugger, of Christiansia.—Missionary.

How the Jesuits Mind Their Own Business.

A daily paper, noting some changes of appointment among the Jesuits, says: "The orders transferring both Jesuit Fathers were attended by the secrecy which usually characterized the transaction of business of the Jesuit order." The Catholic Transcript remarks: "That's so. It is curious that the members of a religious community should wish to conduct their own business without taking the inquisitive reporter into their confidence. The mystery of it all is that the average Jesuit is blessed with a faculty of adjusting himself to any condition that may arise. Today in the full blaze of publicity, tomorrow hidden away in a country mission. One year a college president, another a curate in a city parish. These are the 'secret Romans that have spoke the word and will not falter. Certain editorial articles have appeared in the Boston Transcript which would give one the impression that the New York Review—a high-class Catholic publication of recent establishment—was an organ of 'liberal Catholicism,' or of 'a new Catholicism,' whatever that may be. The Very Rev. J. F. Driscoll, D. D., president of St. Joseph's Seminary, Danwoodie, in a letter to the Transcript of Feb. 18, writes to correct this impression. He says: "It is hardly necessary to say that there is not the least intention on the part of the founders and promoters of the Review to inaugurate a movement that could in any sense be termed 'a new Catholicism.' To entertain such an idea would be absurd—there could be no surer means of defeating the real purpose we had in view." Agate, Father Driscoll says: "We desire, moreover, to affirm most emphatically that the New York Seminary (and the same is true of the New York Review) will stand for nothing that can be taken as a departure from strict orthodoxy."

Hoarseness.

Helene Decker, Jordan Ferry, N. S., writes: "A few months ago I had a severe cold in my throat and chest and became quite hoarse. A bottle of Dr. Wood's Norway Pine Syrup soon relieved the hoarseness and cured the cold." Minard's Liniment cures Colds. "How long is it going to take to get through with this case?" asked the client, who was under suspicion of housebreaking. "Well," replied the young lawyer, thoughtfully, "it'll take me about two weeks to get through with it, but I'm afraid it's going to take you about four years."

Minard's Liniment Co., Limited.

Gentlemen,—My daughter, 13 years old, was thrown from a sleigh and injured her elbow so badly it remained stiff and very painful for three years. Four bottles of MINARD'S LINIMENT completely cured her and she has not been troubled for two years. Yours truly, J. B. LIVESQUE. St. Joseph, P. O., 18th Aug., 1900. Lecturer (on the French Revolution).—It is impossible to imagine the chaos that reigned—confusion and anarchy everywhere. In our more peaceful condition we can not even imagine such a state of things. Man at the back of the hall.—Yes, we can, mister. Come up to our house; we're movin'.

Minard's Liniment for sale everywhere.

At this time of the year when sore throat, pain in the chest, rheumatic pains and aches are so prevalent, it would be wise to keep on hand a bottle of Hagar's Yellow Oil. It is a perfect medicine chest. Price 25

USED MEN AT THE OFFICE AND WOMEN IN THE HOME CHILDREN AT SCHOOL.

Every day in the week and every week in the year men, women and children feel all used up and tired out. The strain of business, the cares of home and social life and the task of study cause terrible suffering from heart and nerve troubles. The efforts put forth to keep up to the modern "high pressure" mode of life in this age soon wears out the strongest system, shatters the nerves and weakens the heart. Thousands find life a burden and others an early grave. The strain on the system causes nervousness, palpitation of the heart, nervous prostration, sleeplessness, faint and dizzy spells, skip beats, weak and irregular pulse, smothering and sinking spells, etc. The blood becomes weak and watery and eventually causes decline.

Milburn's Heart and Nerve Pills

are indicated for all diseases arising from a weak and debilitated condition of the heart or of the nerve centers. Mrs. Thos. Hall, Kelson, Ont., writes: "For the past two or three years I have been troubled with nervousness and heart failure, and the doctors failed to give me any relief. I decided at last to give Milburn's Heart and Nerve Pills a trial, and I would not now be without them if they cost twice as much. I have recommended them to my neighbors and friends. Milburn's Heart and Nerve Pills 50c. per box or \$ for \$1.50, all dealers, or The T. Milburn Co., Limited, Toronto, Ont."

At Budapest, Hungary, recently, Rabbi Jacob Sobornik was baptised into the Catholic faith. His withdrawal from Judaism two years ago produced a passing sensation in

MILBURN'S LAXA-LIVER PILLS

are mild, sure and safe, and are a perfect regulator of the system. They gently unlock the secretions, clear away all effluvia and waste matter from the system, and give tone and vitality to the whole intestinal tract, curing Constipation, Sick Headache, Biliousness, Dyspepsia, Coated Tongue, Foul Breath, Jaundice, Heartburn, and Water Braak. Mrs. R. S. Ogden, Woodstock, N.B., writes: "My husband and myself have used Milburn's Laxa-Liver Pills for a number of years. We think we cannot do without them. They are the only pills we ever take."

MISCELLANEOUS.

"Will you grant me one last favor before I go?" asked the rejected suitor. "Yes, George, I will," she said, dropping her eyelashes and getting her lips into shape. "What is the favor I can grant you?" "Only a little song at the piano, please. I am afraid there is a dog outside waiting for me, and I want you to scare him away."

Castor Oil or other Cathartic is not needed after giving Dr. Low's Pleasant Worm Syrup. This remedy contains its own purgative and not only destroys but carries off the worms. Price 25c.

"What has become of the big man who used to beat the brass drum?" asked the private of the drum-major. "He left us about three months ago."

"Good drummer, too, wasn't he?" "Yes, very good. But he got so fat that when he marched he couldn't hit the drum in the middle."

Hoarseness.

Helene Decker, Jordan Ferry, N. S., writes: "A few months ago I had a severe cold in my throat and chest and became quite hoarse. A bottle of Dr. Wood's Norway Pine Syrup soon relieved the hoarseness and cured the cold." Minard's Liniment cures Colds. "How long is it going to take to get through with this case?" asked the client, who was under suspicion of housebreaking. "Well," replied the young lawyer, thoughtfully, "it'll take me about two weeks to get through with it, but I'm afraid it's going to take you about four years."
