London, June 8.—Canadian Associated Press.—That he has recanted his ideas announced a ear ago anent the advisability of imperial federation on a par-liamentary model, was admitted by Sir John Findlay, formerly a noted legislator of New Zealand, in his address before the meet-ing of the Colonial Institute. The past ten years have seen change in the conception and practice of imperialism as rapid as fateful. Sir John said, and the lesson of recent developments is that we must rely upon the sure foun-dations of the British commonas enunciated not long since by Sir Robert Borden while still prime minister of Canada, namely, the complete autonomy of the dominions, with Britain primus inter pares.

Sir John suggested, however that some method must be de vised to fill the wide gap in im-perial councils which existed between the visits of the domin ion premiers to London.

Says War Between Britain and U.S. An Impossibility

New York, June 7 .- Secretary of War Weeks, in an address today to the graduating class of New York University, declared that war between Great Britain and United States was an impossibility. He opposed disarmament for the United States on the ground that there were "active and feverish military preparations among those with whom the United States might possibly come in conflict," but added "I want to say here and now that I cannot give a moment's serious consideration to the possibility of war with Great Britain." Such a conflict, he declared, would, in his opinion, be the end of civilization.

Under present conditions, it would be the height of folly for the United States to be the first to disarm, Mr. Weeks

"World-wide disarmament must come as the result of an international agreement, and must be done simultaneously," he said. "Prudence would not permit our disarming while others hold weapons in their hands.
