SOCIAL SERVICE COUNCIL TO AID IN FINDING WORK
Unemployed Men Will Be Urged to Go On Farms.

The official report of the special committee of the Social Service Council, which met some days ago to discuss the probable unemployment situation during the coming year, was furnished to the Advertiser today as follows:

The Social Service Council has assisted a special committee the task of endeavoring to secure employment for those in need of it.

Although this city is probably more favorably situated in respect to unemployment than other large centres of the Dominion, there are at the present time many who are without work and are unable to do so. Unless there is a sudden and rather unexpected revival of business, it is probable that the city will not likely to improve, and there may be still greater scarcity of work before next spring.

Work on Farms.
Work, while scarce in the city, is very plentiful on the farms and hundreds of unemployed men might find employment for many months.

This statement is now made public by committee to those who are interested to those who wish to look into the matter with a view to securing employment for themselves or their families, and to those who are interested in the welfare of the community and who are desirous of doing so.

The case of married men, with or without families, is a difficult one, and a family in town while the man goes on the farm is likely to be made more secure, with the help of the farm, a small house or cottage in the country, and with the help of the farm, the man can secure plenty of work by hiring out to the farmers. This would give him a certain income, and would give him to work for the best wage he could secure, and would certainly be better than living without employment.

Single Men for Farms.
By arrangement with the local representative of the Immigration and Colonization department of the Provincial Government, an effort will be made to place those who are willing to do their place on the farms, and to relieve the situation by seeking employment on the farms. It is pointed out that the effect of a large number of single men on the farms would be to greatly increase the chances for married men, with or without families, to find work in the city. Applications will be received between the hours of 10 and 12 o'clock in the office of the Social Service Council, office of Toronto Building.

FINES EXCESSIVE
Assert Victims of Constable's Sabbath Day Activities.

From the whole of Western Ontario, come reports that certain Middlesex county constables are making a fortune out of the expense of London district motorists. Two sections of the motor vehicle act of Ontario, pertaining to speeding, are said to be the medium through which this money is secured. Motorists are up in arms over the matter, and Dr. Hugh A. Stevenson, M.L.A. for London, has promised to bring the matter direct to the power that be at Toronto.

It has been claimed that two or three constables in particular have been trapping auto drivers wholesale at the intersection of the Wellington road and Brick street. It has even been claimed that these constables issued almost one hundred summonses as a result of work done on a certain Sabbath Day. As it is well known that the constables of London are practically the same as those of other cities, they will be retroactive to July 15 on a tentative agreement.

Deputy Magistrate P. H. Bartlett remanded a 19-year-old man in police court this morning in order to give him time to think where he got his clothes. He stated that a man who lived on Wellington street south of the G. T. R. tracks, gave it to him. As the court was adjourned, the man was ordered to appear in court on Wednesday. The party was, he remanded him for a week. CITY PARKS
The latter donated to the city recently by Dr. D. H. Amott.

Many Goldfish.
An occasional fish reveals the fact that goldfish swim about in its cooling depths, these members of the finny tribe wintered in the waters of Springbank each year. In contrast, congregated on the benches about the pond, may be seen a group of old men, and settle the vital affairs of the world, with a draw in the vote usually producing a tie.

Remove 40 Trees.
It is pointed out that last winter 40 trees were removed from Victoria park without the citizens noting the difference made, so dense is the foliage here. The signs announcing the names of all trees were undoubtedly taken down a few years ago by F. E. Leonard.

New Lamp-posts added to the park.
The new lamp-posts added to the park are of the latest design, and will be of additional standards being provided. A new fountain would greatly assist in beautifying the park, the one at the intersection of the Victoria road and the late Col. Lewis, at one time a beautiful structure, has now a greatly deteriorated appearance, and it is suggested that it be replaced by a new fountain. At the same time a new bandstand to replace the existing ruins is suggested. It is suggested that the old bandstand be replaced by a new one.

New Iris.
Superintendent Graham announces that several new varieties of iris are on view in the Victoria gardens, which are three weeks ahead of their usual flowering time. In his opinion early in August, these specimens of iris were recently imported from France by the public utilities.

They are cared for along with other delicate plants at the city greenhouses, situated on the Victoria road, en route to Springbank. A section of these greenhouses is electrically heated during the winter months, and has seen hundreds of bulbs for next year's gardens, and a similar number of young plants are being raised in the city greenhouses. NEW YORK RAW SUGAR FUTURES ARE STAGY
NEW YORK, July 29.—The raw sugar market was firm early today at 3 1/2 for Cuba, cost and freight, equal to 4.86 for centrifugal. No sales were reported.

Raw sugar futures were staidier on covering and buying by Wall Street in the afternoon. Prices at midday 2 to 3 points net higher.

In refined sugar there are only three offerings and the market is quiet. Further having withdrawn. Prices are unchanged at 6c for fine granulated.

Trading in refined futures consisted of a few contracts of December at an advance of 10 points.

WALL STREET REVIEW.
New York, July 30.—A dull and heavy tone in stocks and an active and strong market in bonds were the chief features of the week's stock exchange. Industrials comprising the secondary group of equipments and various specialties were the most active. A moderate decline of 10 to 25 points, rails alone displaying comparative firmness.

Statements of earnings for the second quarter of the year, as submitted by the United States and Bethlehem Steel Corporation, plainly indicated the satisfactory state of that basic industry.

The money market alone afforded ground for encouragement. Call loans were made at as low as 3 1/2 per cent, the lowest quotation in almost two years.

Sentiment respecting general business conditions was more hopeful. Bankers' confidence points reported a turn in the tide.
