THAT DANGEROUS DIMPLE.

But, oh, that dimple in your chin!
I'm sure my heart lies buried there.
In such a pit 'twere sooth no sin
Te fall. Your eyes were beacons fair;
Id ank the fragrance of your hair;
You digged the pit, I tumbled in.
And then you did not seem to care.
But, oh, that dimple in your chin!
I'm sure my heart lies buried there.
Nor prince, nor peer, nor paladin
Had e'er a tomb se rosy rare—
So white without, so pisk within—
To kiss that sepulchre I dare?
But, oh, that dimple in your chin!

"Ah! it was a gale," said Mrs. Rams-othem; "it shook cur house by the sea-

A Dobson on Standard Time, |

BALLADE. "Presidents! Train starters valorous!
Astronomers, sleo, of all degrees,
Hearken swhile to the prayer of us
Persons perhaps who are half over spar,
Passes we ask not, here on our knees;
Sunb us not rudely, we beg and pray.
Loi-for the minute-hand we refore
Give us the columnes you've snatch'd away

Presidents! Time clarks! be piteous!"
(But they ceas'd not singing their timeful

"Astronomers! do be magnanimous!"
(The astronomers gazed with a gaze to freeze.)

Nothing they got or of hope or ease—
Only to beat on the breast and say:
"Standards of Time are rare mysterees—
Give us the mignutes you've snatched away!"

Youth! take heed of the prayer of these.

Many there be on the flatinoad way—
Many that cry toward the Eastward seas:

"Give us the minutes you've snatched away!"

TWO MYSTERIES;

Hunted Down.

"But her strength, as often happens with delicate and nervous women, lasted only a few seconds. She was not half way from here to the Polyriere when her speed re-axed, her limbs trembled. Ten steps urther on she lottered and almost fell some steps further, and she became so ex-sausted that she let go her hold upon her kirts; they trailed upon the snow, tracing faint circle there.

"Then the woman with the .broad foo came to her aid. She seized her companion around the wais; she dragged her along; their footprints here are ming ed confusedly; then seeing that her friend was about to fall, she caught her up in he strong arms and carried her-and the footprints made by the women with the small

Was Lecoq merely amusing himself by inventing this story? Was this scene anything but the work of imagination?

Was this accent of deep and sincere con-viction which he imparted to his words only feigned?

Father Absinthe was still in doubt, but he thought of a way in which he might

satisfy his uncertainty.

He caught up the lautern and hurried off to examine these feetprints which he had not known how to read, which had been speechless to him, and which had yielded

their secret to another.

He was obliged to agree with his companion. All that Leceq bad described was written there; he saw the confused footwritten there; he saw the confused foot-prints, the circle made by the sweeping akirts, the cessation of the tiny imprints.

On his return, his accuracy his accuracy is a confused from the confused foot-ward to pay cash for everything I purchased.

Now my credit is good, I cambuy anything I want without money. On his return, his countenance betrayed and it was with a shade of embarrassment

"You can scarcely b'ame an old man for being a little like St. Thomas. I have touched with my fingers, and now I am

content to follow you The young policeman could, not, indeed, blame his colleague for his incredulity.
"Then," Lecoq continued, "the accom pilce, who had heard the fugitives coming ran to meet them, and he aided the woman with the large feet in carrying her compan-ion. The latter must have been really ill for the accomplice took off his hat an i plank. Then, thinking the surface was no yet dry enough, he wiped it with the skrt of his overcoat. Were these civilities pure gallentry, or the usual attentions of an in-

irv, or the usual attentions of an inI have asked myself that question is much, however, is certain; while is much, however, is certain; while is much, however, is certain; while is dead?" "Yes," replied "oid fellow, I bear that your grandmither is dead?" "Yes," replied "oid fellow," semewhat sadiy, "she died yesterday." "It is the way of the world. We must all die semetime, and the old lady was must all die semetime, and the old lady was ferior? I have asked myself that question his much, however, is certain; while the woman with the small feet was reseverior her strangth half reclining upon this to one side, fire or six feet to the left, just by that enormous block of granite.

Like all men of limited intelligence, Fatger Absinthe had suddenly passed from unreasoning distrust to unquestioning Henceforth he would believe anything

from the same reason that had, at first, mad With no idea of the bounds of human

reasoning and penetration, he saw no limits to the conjectural genius of his companion With perfect fairh, therefore, he inquired:
"And what was the accomplice saying the woman with the broad shoes?" I Leonq smiled at this naivete, the other

It is rather difficult for me to answer that question," he replied. I think however that the woman was explaining to the man the immensity and imminence of the danger that threatened his companion, and has bin rayther perturbed of late?" conthat they were trying to devise some means to rescue him from it. Perhaps she brought certain that she ended by besseching the accomplice to run to the Polveriere and see what was passing there, And he did so, for his tracks start from this block of

"And only to think," exclaimed the offi cer, "that we were in the hovel at that very moment. A word from Gevrol, and we moment. A word from Gevrol, and we should say that it was wuss - considerably mught have had handcuffs on the whole wuss, and I'm blowed it I don't travel with

ing! How unfortunate!" on the contrary, he gave heartfelt thanks

for Givroi's blunder. Had it not been for ortunity of interesting himself in an affai at grew more and more mysterious, but sich he hoped to fathem finally.

To conclude," he re-umed, 'the accome soon returned; he had witnessed the one, he was afraid, and he hastened ick. He feared that the thought of exoring the premises might enter the minds the police. It was to the lady with the mail feet that he addressed himself. He explained the necessity of flight, and told her that a moment's delay might be fatal. At his words, she summoned all her eaergies; she rose, and hastened, clinging to shearm of her companion.

Fish Cut of Water.

MAN SAW IN THE SWAMP GELS THAV LILING

Dd you ever see a fish leave the water

the other day for a week's shooting, and one afternoon I was lying in the bush in the swamp taking a smoke when I heard a "Did the man indicate the route the sort of a splashing near me. I kept quiet, thinking it might be a bird, but in a mowere to take, or did they know it them selves? This much is certain; he accomment I saw the biggest eet you ever laid your eyes on moving up from the watter. In panted them some distance, in order to a second it had wriggled itself 'into the l "But above the duty of protecting these women, he had still a more sacred duty to perform—that of surcoring his accomplic if possible. He retraced his steps, passe another came out and then several more. They all dashed at the shore with a rush, here again, and the last fooiprini that I can discover leads in the direction of the Rus du Chateau-das-Rentlers. He wished to know what would become of the murderer and went to place himself in his path. Like a dilettante who can scarcely res train his applause until the close of th norceau that delights him, Father Abslath had been unable to repress his admiration ing that he gave full vent to his enthus!-

"You haven't one of the eels or one of crawled over?" suggested the reporter.
"No, I haven't," was the reply, "but I shot some of the eels as they were going by. What would you call that? Shooting on the fly, on the wriggle, or what ——?"

Very well. In comparison with you, the General is only John the Baptist."

Certainly the flattery was gross, bubit was The reporter gave it up, but later on, consulting a fish expert, learned that the

story was not a joke after all. "Leaving the water," said the expert,"is one of the commonest features of eel life, and I have often observed it. It is merely to move from one body of water to another for some reason of their own. In a portion of Maine that I am familiar with there is a little stream that flows into the sea that is alive with eels, and at night they go down to the salt water with the ebb tide and return with the flood. I have seen them comdown in such masses that they were actualv crowded out of the regular small chanel and the entire stream was covered with them, wriggling their way down to the saltwater; as soon as the tide rose they would go back. After a while this river was filled up so that the fish could not reach the sea, and then they began regular over-beach journeys, and their paths were as well defined over the flit beach as that of any animal, and in doing this they had to travel overland for seventy-five feet or more. In the winter the eels disappeared entirely, a great puzzle to the fishermen. Some thought they buried themselves in the mud, but the fact is they go out to sea dur. ing that season and live in deep water and

toward spring breed. "A few years ago I was traveling in the Fig. Islands, and being interested in fishes was collecting all the specimens I could. Upon inquiring for the best localities one of my native men named a long, flat, paddy beach, where he insisted that we could find the fish hopping about. I was naturally have just inherited \$100,000. A cool \$100,incredulows, but went around and found it even more remarkable than he had stated. The beach was low, flat, and rather heavy, and at low tide traveling was rather diffi-cult. We walked along near the water and very soon I saw a small toad-like obct leaping ahead of me. At first I thought I want without money. I don't need this money, and that's what troubles me." chances on land than in water, which it could easily have taken to. I gained on it after a while, and finally got my hat over it and landed my game. It was about eight nches long, and was one of the gobies. The head was large, the eyes prominent and protruiting, and the pectoral or side fins so strong that they were actually used as feet, and upon them the fish landed in

side, and I couldn't help murmuring to myself, as I lay awake, the words of the or less it gives them a very comical appearold song you know, my dear, "Cease, Rude Borax"—Punch. "The fish are really as amp'iblous as the frogs, and crawl and hop upon the shores just as a frog would, in search of a shelless mollusk that is found there. In New Zeapos the native saughong is a dry-land fish; its scient fic name is gobius fasciatopunctaius, and in China, a similar fish, called the white frog, or pakkop, is carried about the well advanced in years. She left a last will and testament, of course? I have unstreets by the dealers alive in a basket. What is called the flower fish, so common There she talked with him, and, as he listened, the man leaned upon the snow-covered stone. His hand left a very distinct imprint there. Then, as the conversion continued, he rested his elbow upon the snow surface?"

What is called the flower fish, so common on Chinese ware, is an equally remarkable amprint there. Then, as the conversion of hers. You were glways a favorite of hers. Your name was mentioned, of sarten continued, he rested his elbow upon the snowy surface?"

Yes," he replied, and here the trans began to stream down his cheeks, when the dealers alive in a basket. What is called the flower fish, so common on Chinese ware, is an equally remarkable amprintions sish.—the beterphthalmus The blemy often shows a disposition to go out to fish active element, and one that was the convergence of the snow surface. The property of the same of the snow surface of the snow s on Chinese ware, is an equally remarkable a weak or ill-leveloped brain straining to and nearly buried in flowers, is supposed to represent the much-venerated "Noire of its hative element, and one that was great for it." kept by an acquaintance of mine would leave the water at certain times and hop "my name was mentioned. I'm to have the testament."—Philadelphia Call. on to a rock and sit there for half an hour

"Do the fi shes breathe air or are the gill kep moist? asked the reporter.
"That is a question," replied the fis ishes had what are called latyrinthing cavities, in which they carried water to moisten the gills. Thus their submarine conditions of life would not be disturbed; but it is known that these cavities contain air, and the fishes like the periophalmus are more truly amphibious than even frogs. The climbing perch of the East is an excellation and the fishes like the periophalmus are more truly amphibious than even frogs. The next experiments were made on a dog with an opening in the latter arms of next experiments were made on a dog with an opening in the datache come on or increase in intensity The other day a lone man sat in the rall road depot at Elm ra, having a lean gripsack at his elbow, and his battered hat drawn down over his eyes.
"Gome from New York?" queried an old chap in a gray wool suit, as he sat down lent example of an amphibious fish. In India they are much sought after as edible "They say the stock market down than' fishes, and are carried by the natives from the marshes of Jazor to Calcutta, a journey of nearly a week, out of water, and lavaria bly reach there alive. They climb palms evidently to obtain food. This has been "Happen to perturb you any?"
"Perturb! Perturb! growled the Yorker.
"wby, you old ass, I was cleaned out of

When I reached the cabin I was thoroughent year 11 species from the Mediterranean have penetrated the canal as far as Suez The Red Sea, on the other hand, gave no fewer than 25 species, which, however, have only for the most part scarcely reach ed half-way toward the northern entrance

Marriage, as practiced among the negroes of Senegambla, has been written upon in a very entertaining way by M. Berenger Feraud. As in other parts of Africa, the parental tie is slight, divorce is a matter of every-day occurrence; women are to all in-tents and purposes slaves, and the marriages are attended with elaborate ceremonial simply as pretexts for amusements and intemperance.

It is said that a Hamburg manufacturer, conversing with his store room manager by telephone, received a reply which annoved him, and he replied in an insulting manner. The manager pretended not to have heard the remark, and asked to have colleague to take his place and receive the second edition. In this manner he se-cured a witness, and is now proceeding against his employer for libel.

M. Vieusse, principal medical officer of it was a frog. It cleared about a foot each time, landing and holding its head high. I have the strangest one in which I ever engaged experiment was made at the Lyceums and colleges. Since the the strangest one in which I ever engaged experiment was made at the Lyceums and colleges. Since the few cases where this suppresses the abundant was the leaping fish. Then began a race, the strangest one in which I ever engaged experiment was made at the Lyceu Louis-left dant wasting of the feet, under whatever form it appears, can be quickly cured by carefully conducted friction with the subnitrate of bismuth, and even in the few cases where this suppresses the abundant wasting of the feet, under whatever form it appears, can be quickly cured by carefully conducted friction with the subnitrate of bismuth, and even in the few cases where this suppresses the abundant wasting only temporary that it is the conduction of the feet, under whatever form it appears, can be quickly cured by carefully conducted friction with the strangest one in which I ever engaged experiment was made at the Lyce Louis-left. excessive sweating of the feet, under cured by carefully conducted friction with the subnitrate of bismuth, and even in the dant sweating only temporarily it still re often accompany the secretion. Dr. Vieusse Dr. Ladell has discovered that prussic acid is an antidate to poisoning with strychnine. Medical men will be cautious in

A paper of value to dyers has been read by M. Horace Kee hlin, of the indus-trial Society of Mulhouse. It relates to the fixation of colors by means of gelatine randered insoluble by means of potassium dichromate. Mineral colors and certain antitue colors are thickened with gelatine and printed upon cloth prepared with sodium hyposulphate and then pass through potassium dichromate. The colors bear scaping at bolling heat, and sustain the action of sunlight without a teration.

The so-called "Maye," or May Queen of Provence, a festival by which the return of the month of May is celebrated in South-ern France, has been traced back by Dr. Berenger-Feraud to the ancient cult of Dime du Maia" of Provenca.

Dr D ydd Young in the Practitioner E Jessen, a German chemist of note, has scanty secretion. 2. In cases where it is being administered, and an increase of "That is a question." replied the fish authority, "that caused much discussion among scientists. The old notion was that fishes had what are called latyrinthine cavities, in which they carried water to nours, and the undissolved portion weighed. The their cavities in which they carried water to nours, and the undissolved portion weighed fevers the combination of the drug with the case requires the most careful atten-

Suddenly, during a perfect calm at Karengon, in the province of Bonns, Sweden, a violent whirlwind arose on the night of Sept. 24. It came from the south-east, bringing with it quantities of sand, earth, every of ject as visible as at noon. The tl-lumination was caused by a grand meteor, shaped like an egg, "which appeared in the zerith, and which at first seemed to consist of myriads of large sparks, gradually changing into a star shining with a blinding lustre, and with all the colors of the rainbow, in the north-west, four or five metres above the horizon." As quantity was given as to correspond in the quantity of nitrogen it contained to 100 grammes of beef. The time was as for lasted only about one minute.

A LITTLE BEHIND HAND.—Some people arealways a little behind hand in all undertakings; delays are dangerous, and none more so than in neglecting what seems a triffing cold. Prudent persons break up the ill effects by timely use of Hagyard's Pectoral Balsam, thus prevent ing serious lung troubles.
