## THE IRISH STILL DEFIANT.

THE GOVERNMENT'S WEAK POLICY  
STRENGTHENS THEM.

The Alleged Murderers of Constable  
Whelan Committed to Trial—Lord  
Mayo's Paper Continues to Be  
Praised by Sectionists.

London, Oct. 8.—The collapse of the Government's prosecution of Lord Mayo Sullivan and Mr. O'Brien involves a great deal more than mere delay in the enforcement of a single clause of the Coercion Act. Since the Dublin magistrate's decision and free construction of the clause of the act forbidding the publication of reports of the proceedings of suppressed branches of the National League the masters have been compelled to take refuge in England and Ireland, and their opinion far given supports. Magistrate O'Donnell's opinion making it extremely improbable that the Government will proceed with its appeal from his decision. The discussion of the case in court disclosed a road by which the League may drive a coach and six through the Crimean.

Judge O'Donnell dismissed the case against Mr. Sullivan, on the ground that proof was wanting that the reports published were those of branches that had been suppressed by proclamation. The Crown counsel pointed to the fact that this decision implied that the Government, in event of subsequent charges of suppression, would be compelled to meet meetings whose proceedings were published, were really meetings of suppressed branches of the league, and that the persons present at these meetings were really members of those branches. This construction, he contended, was tantamount to personally discrediting the prosecution, unless charged with being made by the sectionists of incriminated parties, and further than this would be impossible under such interpretation of the law.

The position, therefore, is that if the decision of the courts holds good, not only will press conferences be futile, but the Government will find great difficulty in proving even that meetings of suppressed branches are illegal.

3. **DAVIES AT NEW YORK.**

New York, Oct. 8.—Michael Davitt, the Irish leader, arrived in the city yesterday evening. On Wednesday last he spoke to a large hall on the steamer *Otto*. "I think," he said, speaking of the prosecution of Mr. Sullivan, "that the Government has made a mistake. It is refreshing to know that some one besides ourselves are making mistakes." He said that he had been very ill but I may be speaking foolishly on the subject, as I believe I shall be prosecuted when I return. My return trip here has been much more bothered by the Plan of Campaign than they were by the killing of Bulfinch. The dead man's place is not him but is my country. Too many Irishmen are coming here for the good of Ireland, and it is our intention to stop them coming by furnishing adequate employment at home."

A large force of police, mounted and on foot, accompanied the march, which was soon returned to Trafalgar-square, and, with the followers attracted, held a meeting. The orators who addressed this assembly, described the hardship of the lot of those whose only resting place is the wood. The speaker, son of Hugh Gilmore, who had just established a shop in the square, and declared that the only means he had of drawing the attention of the public to his shop was to go to the door of the shop, they had just made. THE CHOLERA AT NEW YORK.

The Health Officer Reports Regarding the Alien's Passengers.

NEW YORK, Oct. 8.—Health Officer Smith has prepared a report of the cholera cases which have been three weeks ago caused by the steamship *Alien*, from Naples. It states that the disease has been very virulent and rapid in its fatality in the majority of cases. In several instances the patients were well at one inspection and nearly pulseless twelve hours later. The report also tells how the ship was funighted. It was thoroughly washed with boiling water twice and after with a solution of chlorine, containing 100 parts per 1000 of water. All clothing and textile fabrics were boiled in boiling water for hours, and 100 parts of sulphur was twice burned in the hold. Of the eight cases removed from the ship on the eighth day, five died and three recovered. Of those which have developed since the removal to quarantine, nine died, four recovered, and one is still ill. The remaining two are seriously ill. Dr. Smith thinks the infection is now entirely destroyed.

Surgeon Beatty has passed a charge against the captain that he failed to provide hospital facilities for the passengers who died on the passage.

It is alleged that the captain did not provide proper hospitals for his passengers; that he failed to provide hospital facilities for the passengers who died on the passage.

The agents of the Alien say that her misfortune lies in a discouraging effect on it.

The employers held out against the demand and discharge the men to-night unless they receded from their demands. This leaked out, and at 3 o'clock this afternoon the workers struck. The men who were engaged in the printing of the *Oregonian* and the *Advertiser* have joined the strikers.

Two other managers covered elevated platforms reserved for special guests.
