**QUEEN'S UNIVERSITY, KINGSTON**

Ontario Hall Containing the Physical Laboratories.

Scene in Industrial Chemical Laboratory. Prof. G. F. Goodwin.

The installation of a new Chancellor and a new Principal on the same date will bring a great many distinguished Canadians and Americans to Queen's University, Kingston, on October Sixteenth. For although a comparatively small University, Queen's has sent so many distinguished graduates into the world and has gained such a character for sound learning and enterprise in research and education, that it stands high among the institutions of its kind on this Continent.

Queen's came to the front under Principal Grant, who was a born leader of men and gathered round him a brilliant staff of lecturers and professors. Under Principal Gordon, who succeeded Grant, the University continued to prosper and the number of students doubled while the number of buildings was trebled. The new Principal, Dr. Bruce Taylor, has already shown his mettle by raising the half million dollars required to fulfil the terms of an endowment of a further half million dollars promised by the late Dr. Douglas. With a young and active new Chancellor such as Mr. E. W. Beatty, President of the Canadian Pacific Railway, to lend his support, Queen's has every reason to expect to continue to go ahead.

Recognizing the importance of Industry to Canadian development, Queen's has carried on important industrial research work, and Mr. G. Y. Chown, the popular Registrar, has contributed \$50,000 to the endowment of a Research Chair.

Professor Clark, who holds the Chair of Physics, has established a laboratory for the investigation of substances under extremely low temperatures, with the use of liquid air and liquid hydrogen, the only laboratory of its kind in North America. Dr. Reid has been investigating the causes and suggested cures for influenza, and has made valuable discoveries tending to combat the recurrence of future epidemics. Professor MacClement is an expert on the noxious fungi which would destroy our great Canadian forests if left to themselves. Dr. Lathrop has been carrying on valuable research work on trench fever, with the object of discovering the true nature of this curious disease of the European battlefields.

The Arts Faculty of the Queen's is conducted by Professors, who in their own fields of work, are just as enterprising and the man or woman with a Queen's degree has an excellent chance of succeeding in whatever learned profession he or she may adopt. During the year 1918-19 there were 861 students registered in the Arts Faculty. Special efforts were made by all faculties to meet the requirements of returned soldiers whose scholastic career had been interrupted by the war. A summer School in Engineering restricted to men who had been overseas, saved an academic year to a large number of such returned men, and was conducted without Government assistance at the expense of the University itself.

For the last three years the new Arts building and the Grant Hall have been used as a hospital by the military authorities, and there has been abundant testimony to the satisfaction that the patients have felt in being housed so well amid such beautiful surroundings. The soldier patients are now transferred elsewhere, releasing the class room space for the growing requirements of the University.

THE FLAVOUR LASTS SO DOES THE PRICE!

**ASBESTONE**  
40 Year Roofing

No Rags or Tar in this roofing. Pure Asbestos and Asphalt, cannot rot or dry out. Costs but little more than the ordinary kind.

It is far more durable, as well as fire resisting, and just as easy to put on. Any other roofing would be totally destroyed by fire. Not so with Asbestone. It is not what is on a roofing but what is in it that counts.

Write for information and sample. If you can't get it through your dealer, we will send it to you direct. We want dealers to handle it.
