Trade at the Toronto Cattle Market to day showed little improvement as compared with least week. The run was light, and it was better thus, because the aggregate demand was nmail. There was an inquiry for a few odd lots of the cholerst quality, but with regard to the other grades buyers were indifferent. Un the whole, a better tone prevailed, although prices advanced very little. The day's offerings were sold early, and the good ones, which were comparatively scarce, were snapped up at good prices. The situation is still uncertain, and dealier asynthat heavy receipts would send prices down—rather suddenly. Exporters are actile are still a tride duli, although the top grades are a little dearer.
