

Agreement (hereinafter the "Originating Party") is received by the other party (hereinafter the "Processing Party"), either directly or indirectly, for processing, including conversion, enrichment and fabrication, on behalf of a third party, that nuclear material shall be transferred from the Processing Party to a third party that is acceptable to the Originating Party and has been so designated in writing. Such transfers of nuclear material shall take place within twelve (12) months of the entry of such nuclear material into the territory of the Processing Party.

- (b) if nuclear material is transferred from the Processing Party as required in paragraph (a) above, the requirements of Article VII(2) of the Cooperation Agreement shall be deemed to be satisfied with reference to that nuclear material.
- (c) for the purpose of Article V of the Cooperation Agreement, the Originating Party provides consent for the Processing Party to transfer nuclear material identified in paragraph (a) above to those third parties that are acceptable to the Originating Party and have been so designated in writing.
- (d) with reference to Article IV(2) of the Cooperation Agreement, nuclear material received by the Processing Party from a third party that has identified the nuclear material as being subject to a nuclear cooperation agreement with the Originating Party shall be subject to the Cooperation Agreement.
- (e) the administrative arrangements required by Article X of the Cooperation Agreement shall include all administrative procedures necessary to facilitate the effective implementation of the provisions of this Note.
