Sources: Dominion Bureau of Statistics and supplementary data from individual companies.

<sup>1</sup>Includes for the first time data obtained from some byproduct producers. To compare the 1961 figures with those of 1960, make the following deductions from the first 1961 column: from Ontario, 233,750 tons; from British Columbia, 148,780 tons; from the total 382,530 tons.

<sup>2</sup>Total of shipments of byproduct iron ore compiled from data supplied by individual companies to the Mineral Resources Division. This total does not correspond with the data in footnote<sup>1</sup> (above).

<sup>3</sup>About 582,700 tons from the 1961 total and 740,000 tons from the 1960 total were transhipped to West Germany.

\*All 1961 figures are subject to revision.
