

under the schools, but under the general Public Health Department, it might be desirable. Do you think it

would be desirable to put a Public Health specialist on the Committee?

DEAN LEMESURIER: May I take it that the course in the schools-- I think the course of education is important

PROF. HUGHES: It was felt, Mr. Chairman, that nothing short of an adequate medical service would really meet the case. The mere presence of a medical man on the Committee would not be enough.

called the adolescent period, it is contemplated there

Would it be wise to have a competent Public Health man on your Supervising Board of the students joining high school? Protestant Committee?

PROF. HUGHES: Yes.

PROF. HUGHES: I take it that the only way of safeguarding the quality of your service is in your appointment.

MR. CURRIE: In this case, the Protestant Committee has to rely on the City; it has no health service.

DEAN LEMESURIER: Differentiation of those who are ge-

PROF. HUGHES: It is a difficult and complicated question, and those who are studying technical subjects,

and those seeking commercial training, and junior high school students leaving school more or less fitted for students, hygiene, sanitary conditions, etc., if under their particular task, but some will continue on, and the conditions assumed by Dean Lemesurier a public health person were provided for the Protestant Committee? lines of academic, technical and commercial?

PROF. HUGHES: Yes, provided you interpret the term

PROF. HUGHES: It might help, Mr. Chairman. I think "technical" liberally, to include training for city- the feeling of the Committee on the whole was that the are work and technical training of the agricultural
