SATURDAY MORNING, APRIL 3.

Noblesse Oblige

Lord Kitchener's action, along with the letter of His Majesty King George, will do more to place the dispute about the liquor question on its true basis than anything that has yet been proposed. All the attempts from the pulpit and on moral and ethical grounds have aroused more opposition than sympathy, and the plan of making it a political issue has been ineffective wherever tried. Appeals from the medical point of view have been of little effect, either.

The whole question now enters on a new phase and will be regarded from the standpoint of patriotism, of efficiency, of business interest, and, briefly and chiefly, of national survival. If-Great Britain cannot produce enough ammunition and arms during the next year to keep her troops in the field supplied, the cause of the allies may suffer defeat. This is the issue in England today.

It will be wiser, as it will be finer and nobler in every way, if the great problem can be solved by voluntary example of the ministers of the crown, rather than by compulsion and legisla- fore closely associated with the pastion. There is something in British sion and resurrection of Christ, much idea prevails about prohibition. In a fixion, is, of course, of purely Chrisbe the baser sort who will make it practice of the Western Church in-

Resources of Newfoundland

Newfoundland, however, had been covered, the commission prepared and recently issued their report on that colony. It is an interesting summary of the resources of Newfoundland, and calls special attention to the valuable deposits of hematite iron ore at Bell Island. The commissioners say that Island. The commissioners say that revealed nothing comparable to these cause of Christian civilization will be deposits in extent, save those at Iron Knob and Iron Monarch, Australia. Aitho estimates of the amount of ore are largely hypothetical, a Newfoundland official paper places the probable quantity at over thirty-five hundred million tons, of which up to the end of 1913 only twelve million tons had been extracted. Altho the percentage of phosphorus is too high for steel making by the acid process, the ore can be utilized for basic steel, and the commission regard the Newfoundland deposits as of immense potential importance to the iron and steel indus-

ixths of the total exports of Newpundland consisted of fish and allied roducts. More recently, while these have increased to a moderate extent, exports of other goods have more than doubled, a circumstance principally paper industry. The commissioners fish industry is capable of still further development. Forty per cent. of the total exports of Newfoundland fag end of their labors to a life-long fish, particularly cod, finds its markets devotion. in southern Europe and South Newfoundland fishermen will hardly halibut, for which a market could be when and to what extent these benefound in England. The commissioners ficiaries of the labors of the founders recommend that the imperial and Ca- of the country should make a contrinadian Governments co-operate with bution on their own account. This is the Newfoundland Government in the no easy matter, and it is obvious that scientific investigation of the fish re- there have been differences of opinion sources of Newfoundland, Labrador as to the amount of the liability and laid on the report of the forests, which ent there should be no real difficulty it is advised should be conserved by for the individual. be. Liberty, law and right must be their enquiries in other dominions have protected, must be preserved, or the Fashionable Ready Clothes set back for centuries.

What Do We Owe? An unusually good number of The

Canadian Magazine this month opens with a discussion by Mr. John Lewis of the question whether the pioneers were parasites, or if they contributed sufficiently to the empire in the work they did in its development, or are justly entitled to bear the reproaches of those who say they paid nothing of those who say they paid nothing style and at very moderate prices.

Show what he can give in high-class ready suits and overcoats meeting all the double from the south. The castallies in this charge were numerous, but the position was stormed and taken iries of the United Kingdom and of the charge is really ever seriously made. Mr. Lewis details the labors and hardships which the early settler and pioneer had to undergo, and he is satisfied, as most of us are, that the pioneer "did his bit" in paving the way for what has come after. Mr. Lewis misses one point which might have been urged, inasmuch as large numdue to the development of the pulp and bers of the settlers and pioneers were old army officers, veterans and penare of the opinion, however, that the sioners, who had already done their service for the empire and in retiring to Canada were merely contributing the

FRONTAL ATTACK TURNED THE TRICK

for Supposed Supply Base.

SEVEN HUNDRED MEN

Hundred and Ninth Have Demand for Mineral Molybde-Successful Day Near Leaside

Leaside yesterday again rang with the sound of arms. An attack on the steel and wire cable factory near the the defenders, in the end was successful. A surprise attack in strength on the front turned the trick. Seven hundred men of the 109th Regiment were engaged and tho the fight was not over such a large area, nor were so many men employed as on the day previous, the struggle was hotly and skilfully waged.

The scheme of the exercises, the first of a series of practice fights that will be engaged in by the 109th, was that two companies were holding the factory and part of the railway running to it and that they had orders to vigorously defend it as an important supply base. Capt. Duggan was in charge of the defenders.

Under Major Dinnick and Major Horsfal the balance of the men were to attempt the capture of the place. Two attacking companies, operating from the east, made for the religious to the first produced in England and new supplies are sought accordingly.

That ready clothes cannot be fashionable is a mistaken notion which possibly had some foundation half a century ago when they first came into public notice. Nothing can be more inaccurate now or misleading. Ready clothes are every-whit as well cut, as stylish and as up-to-date as the made-to-measure garments. They Front Successful.

In the meantime another company deployed around from the west, and while the defenders were busily engaged on two opposite sides of the factory, the balance of the besiegers delivered a straight frontal attack at

taken.

Lieut.-Col. Stewart, Capt. Hall and Capt. Frank Stewart acted as umpires and Sergt.-Major Vallis and Sergt.-Major Longstreet assisted in the observations.

Sergt.-Major Longstreet assisted in the observations.

The men were on the move from 9 a.m. till nightfall and put in a very valuable day of field training. The other practice days that may follow weekly will be planned to further train officers in field tactics and develop the ability of the men to make the most of cover till the moment for reporting and as city editor, and di a great deal of good newspaper work in his day. He was also for a time in the Canadian west and on the staff of a number of papers there. His elder a number of papers there. His elder brother, the late George Gregg, was a brother, the late George Gregg, was a continuous ditorial writer on the old

TEACHERS TO PAY PART OF SALARY

Government Will Go Halfway to Provide Superannuation.

IMPORTANT CLAUSE

Contribution of Two Per Cent. is Offered in the

The Ontario Government is prepared to go half way in providing a superannuation fund for school teachers in the province. One important clause in the draft bill submitted by Hon. Dr. Pyne in the closing hour of the session Pyne in the closing hour of the session provides for a government contribution of two per cent. of the teacher's annual salary, a similar amount to that the teacher himself will pay. In the legislative recess several thousand bills are being circulated to different educational centres, and the opinions of school boards and interested parties will be invited. Next year action will be taken.

Local schoolboards will be oblige

Local schoolboards will be obliged to shoulder considerable responsibility. In addition to being required to pay one per cent. of the teacher's salary as their contribution they will collect the teacher's contribution monthly, and will be responsible for it.

To Be Compulsory.

If the bill goes into effect it will be made compulsory and every teacher, whether counting on spending his life in the profession or not, must yield up his salary percentage. The minister stated that it would be necessary for all local pension funds to be swallowed in this greater one, and that to become workable, compulsory contribution would be imperative.

The limits of the pension will likely be \$350 and \$1,000, with the length of service deciding the specific amounts. A service of forty years will qualify a teacher for the pension altho matters of health or extenuating circumstances may allow one after 15 years.

Deduct From Salary.

In carrying out the administrative work in the bill local school authorities will deduct from the teacher's salary the contribution and after adding their own, will refund it to the provincial treasurer.

This money will go into a special

STEEL HARDENERS

nite for Great Britain's

Armaments.

A call has come to Ontario for "steel hardeners," to be used in Great Britain in the preparation of her armaments. The Imperial Institute has station, the vigorously fought off by called attention to the demand exist the defenders, in the end was suc-cessful. A surprise attack in strength names and addresses of any firms in

Queensland, Australia, is holding the larger part of the trade today. The Ontario Government is attempting to see if Ontario is in a position to become an important producer.

SPEAK ON HINDUISM.

d)r. Sunder Singh will speak on "Hinduism" at Friends' Association meeting. Canadian Foresters' Hall, 22 College street, tomorrow at 3.

Mrs. Wiseneighbour Says:--

"I should have told you the other day, when I was speak, ing of 'Eddy's' Washboards, that it is just as necessary to have an Indurated Fibreware Tub to hold your clothes if you want to make a success of washday."

Mrs. Newlywed Says:--

"I've heard of Eddy's Indurated Fibreware. What's the difference between fibre and woodenware?"

"Fibreware is made from compressed fibre, baked at extreme heat. All in one solid piece, it cannot warp or fall apart. No chance of splinters. Wears much longer, looks better, and is light to carry. The latter point you should always take into consideration," concludes Mrs. Wiseneighbour.

SEPARATE SCHOOL **BILL WIPED OUT**

People Will Not Obey Regulations, Says J. A. Pinard of Ottawa.

When the milk wagons were ratling thru the streets yesterday morning and day was breaking on the city, the legislature wiped the bilingual question off the slate for the year. In their own, will refund it to the provincial treasurer.

This money will go into a special account with the government grant as part of the consolidated revenue with interest at 4 per cent. Pensions will be counted a first charge ogainst the consolidated revenue.

Prof. Michael MacKenzie, the well known educationist, worked in conjunction with Law Clerk Dymond in preparing the measure, and it is considered quite workable.

CALL COMES FOR

This money will go into a special account with the government grant as part of the members slumbered audibly, the last contentious matter was disposed of, and the special Ottawa separate school bill passed third reading. N. W. Rowell supported neither the bill nor regulation 17 and would not be drawn by government challenges. He offered no opposition on the measure at the vote. Most outspoken of the French members was J. A. Pinard of Ottawa, who declared that his people would not obey the present regulations.
