

THE CURRICULUM

The School Curriculum is so arranged as to enable a pupil to pass B. C. and McGill University Matriculation Examinations or the Entrance Examinations of the Royal Military College, Kingston, and the Royal Naval College, Halifax, or to enter business life.

This School is accredited to Washington University, i.e., a boy may enter Washington University, Seattle, without examination, except in Science.

All boys throughout the School are expected to take the regular curriculum, without exception of any kind, but special arrangements for commercial instruction can be made for older boys wishing to enter a business vocation.
