## M'INTYRE SHOWS GAIN IN RESERVES

Annual Report Emphasizes Importance of New Discoveries Made at Depth.

The ore reserves of McIntyre Porcupine Mines, Ltd., are now valued at \$1,777,324 as compared with \$4,490,432 a year before, and the cash surplus has increased from \$82,000 to \$1,163,000. These are features of the annual report covering the fiscal year ended June 30, last. The tonnage of reserves is estimated at 438,057 as compared with 459,276 at June 30, 1918, but the average value is now placed at \$11.00 a ton as compared with \$9.80 a year ago. In this connection President J. P. Bickell says: "The improvement in the grade of ore noticeable at depth is most gratifying, and augurs well for the future prospects. The excellent ore developed on the 1,125-foot level—now opened for a distance of 900 feet—has materially enhanced the value per ton of the ore reserves, which now stand at \$11.00, being \$1.20 higher than a year ago. The management feels confident, provided that nothing unforeseen occurs, that the earnings shown for the last four months of this period will be maintained throughout the ensuing twelve months."

In the light of the above assurance is of considerable interest to shareholders. In February production amounted to \$65,487, while in March there was a jump to \$88,733. The other months were April \$84,500, May \$89,637, and June \$92,585.

The president announces that the development program for the year contemplates the continuous sinking of the main shaft which has already reached a depth of 1,400 feet.

Production Record.

The number of tons of ore milled was 179,874 during the year, of an average value of \$9.78 per ton, a gross value of \$1,750,827 and a net revenue of \$1,671,646, which compares with 178,327 tons milled in the previous year of an average value of \$10.05 per ton; a gross value of \$1,793,197 and a net revenue of \$1,714,353.

During its life the McIntyre has produced 791,399 tons of ore, averaging \$9.40 per ton, from which has been received \$7,951,039, or \$8.90 per ton.

The net profit for the year was \$63,850, which compares with \$69,861 in the year previous. To this has been added previous balance of \$84,499, making a total of \$1,527,760, out of which have come \$364,028 in dividends.

General Manager R. J. Ennis reports that 6,637 feet of development work was done during the year. He says: "On the 1,125-foot level No. 5 vein was opened up 900 feet, assaying 18 over a width of 9.5 feet. The east end of this drift is now on the Jupiter and shows ore of excellent grade. The 1,125-foot level is opening up in a very satisfactory manner, showing a more continuous length, width and higher average grade of ore than any previous level opened up on the property."

Mr. Ennis adds: "Operating conditions have improved slightly over the preceding period and we look forward to a gradually declining supply and material market, and an improvement in the labor situation. This will be reflected in lowered cost of operation and will permit development in territory which we have been unable to touch during the war period, and in which are known to exist ore bodies of medium grade."

TO TAKE SECRET BALLOT.

Kirkland Lake, Sept. 20.—Information received thru reliable channels tends to show that at a meeting of the strikers held on Wednesday night it was agreed that a secret ballot would be taken next Sunday. Should such prove to be true it may reasonably result in bringing about the end of the strike.
