We want College men to know that we have during the last sixty years shed their grandfathers and fathers with our own make of shoes, and are prepared as never before to do likewise for them. We have kept pace with the times, and have now the most modern appliances for manufacturing the latest styles of shoe lasts produced in New York and London, England, and can give them the newest things in toe shapes, i. e., Needle, Razor, Tokio, Tilly, etc., etc., in all coloured Tans, Black, Patent Leather, etc., etc., and at following prices: \$3.50, \$4.00, and \$5.00. See them before purchasing elsewhere, for to see them is to appreciate them. Remember, you buy direct from the manufacturers, and from a firm that knows how a shoe should be made, and what materials are best. You pay no middlemen's profits.
