

## P. & O. ENGINE GANG PLOWS

THE STRONGEST AND HEAVIEST MADE

We are the Pioneer Manufacturers of Engine Gang Plows. We have had the experience necessary to build plows that meet the demands of the exacting farmers of today.

### P. & O. Mogul Engine Gang

Five Sizes—  
5, 6, 8, 10 and  
12 Furrow

One of the leading plow men in the country said: "We have been up against the plow game; we have tried them all, but the Mogul is a little the 'sickest' yet."

The Mogul is the latest and best, with new features not found on any others. Platform is level; levers bunched in the center, saving half the walking. Self-castoring gauge wheels and rolling coulters which do not interfere with each other. Simple and strong.

### P. & O. Senior Engine Gang

Four Sizes:—  
3, 4, 5 and  
6 Bottoms

The plow we have been making for years, the plow that is still doing business while other plows, weaker than ours, were strained or pulled to pieces long ago.

### P. & O. Disc Engine Gangs

Three Sizes: 4, 5 and 6 furrow. The simplest, strongest and best disc plows made. Write for our pamphlet on Traction Engine Plowing. It fully describes the P. & O. Plows and gives valuable information as to the capacity of the different sizes, etc. To get this particular pamphlet, ask for Catalog No. 79.

**PARLIN & ORENDORFF CO.**  
Canton, Illinois.

**\$1500 to \$5000 Per Year**

have been made by hundreds of people operating the "American" Drilling Machines. 40 years' experience, 59 regular styles and sizes and the output of the world's largest manufacturers of this kind of machinery make

### "AMERICAN" MACHINES STANDARD

Made in types for every kind of earth and rock drilling or mineral prospecting, equipped with any power, operated with your traction engine. Our new 100 page Catalog Free.

### THE AMERICAN WELL WORKS

Chicago Office: First Nat. Bk. Bldg.

"I knew this, and was going to the window to see if the wire led up or down, when I heard some one approaching. I first supposed that the person, whoever it was, was in the room with me, the steps were so distinct; but when I flashed the light, intending at least to see him, I knew he was above me. One loses the sense of direction of sound, particularly in the dark; and it is an incontestable fact that footsteps, or any sound above, can be heard more clearly than the same sound below. Therefore I knew that some one was in the room above me. For what purpose? Possibly to disconnect the branch wire on the telephone line.

"I waited until the person, whoever it was came down and went his way; then I found the wire, and saw where the connection had been made on it. Then I went straight down to the subcellar. There I saw this Folsom lying on the ground, bound. He was not gagged; yet he didn't answer my questions; obviously because he knew if he did he would place himself in danger. The shot was fired at me, or rather at my light and I went through the farce which ultimately placed me in a coal bin. Then I began to get a definite idea of things from the conversation, when Cranston's name was mentioned several times.

"Folsom persisted in an outspoken declaration to reveal everything he knew, including the story of my murder. He insisted until he placed himself in grave danger, and then, under cover of utter darkness, I extended one hand and pinched him twice on the ankle. He knew then that I was not dead, that I had heard, and did the very thing I wanted him to do—begged for his life. It was a bit of justifiable duplicity. I knew if he was the man his very act so far had indicated that he would humbug Cranston and the other man into letting him go, or at least not committing another murder. Subsequent developments showed that this conjecture was correct.

"From the coal bin I went back to the subcellar, knowing positively now that there would be no one there. Those men were frightened when they left me, and men run from fright. What they would do with young Folsom I didn't know. There, with my electric light, I found the branch telephone. The transmitter box had been ruined by a shot, as I imagined. So, thus far at least, the logic of the affair was taking me some place.

"And then I followed that tunnel through the subway into another tunnel. I should not have ventured into that second tunnel had I not been fairly confident that no one else was there. In that I was mistaken. I don't know now, but I imagine that young Folsom was temporarily being held prisoner there, and that possibly Cranston was on guard. Anyway, there was a

# SUN FIRE

The oldest Insurance Office in the world

FOUNDED A.D. 1710

BI-CENTENARY 1910

HOME OFFICE: LONDON, ENGLAND

Canadian Branch, Sun Building, Toronto, H. M. Blackburn, Manager.
