

PEDLAR'S Saino ALL METAL FIRE DOOR**Does Not Transmit Heat**

Between the two cross-laid sheets of 22 gauge corrugated iron forming the surface of both sides of the door there is a lining of asbestos. This prevents the transmission of heat. Expansion joints permit expansion and contraction along straight lines, thus preventing any warping. As a result, Pedlar's "Saino" Firedoor fits always snugly in place, and, containing only material of superior fire-resisting qualities, acts infallibly no matter how fierce the heat to which it is subjected. Fifteen years of practical tests under all conditions constitute proof that cannot be assailed.

"Saino" Booklet CM on Request.

London Concrete Mixers No. 4 and No. 6

A portable machine made in two sizes, suitable for small jobs, such as building foundations, sidewalks, barn walls, concrete silos or any work requiring a capacity up to 60 cu. yds. per day.

The machines are of the same substantial design and construction as our larger machines. Built to stand constant use.

Equipped with Novo Dust Proof Gasoline Engines, which on a Concrete Mixer will outwear three of the ordinary open type engines.

Will save the price of itself in thirty days' use. Send for catalogue No. 18-13. State capacity desired.
