Manufacturers of

Piano Actions, Player Piano Actions and Solodant Music Rolls

"The Heart of the Piano is the Action"

Every step in the manufacture of Otto Higel actions is carefully supervised. No good piano manufacturer would impair the value of his instrument by putting in an inferior action. No matter how well the rest of the piano is constructed it is nothing without an equally as well made action. Therefore Otto Higel Actions are to be found in the highest grade pianos made in Canada.

The Otto Higel Player Action—the mechanism which the majority of Canadian Piano Manufacturers install in their player pianos—is the choice of those who want the best. It is also the choice of German, French and English buyers, with the whole world from which to choose.

It is smooth running, easily operated, permits the finest shading and phrasing, has great flexibility and reserve power. All parts are made to an exact standard and are interchangeable, and every part is made under our own supervision in our own factory.

The Otto Higel Solodant Music Rolls have revolutionized the player piano. By a device of marginal perforations the proper notes are sustained and the solo or melody is brought out prominently. No longer may the player piano using "Solodant" rolls be called a "Mechanical" player.

These rolls are labeled "Solodant" and "Tempoaid" and are copyrighted. MADE IN CANADA

MUSICALLY Solodant Rolls also possess many other advantages. They track true. The spools CORRECT will not shrink or warp. They are easy to adjust. The paper is the toughest manilla, reducing shrinkage and natural swelling to a minimum. The price is also right. All dealers carry them. Made for 88 note players.
