

K

- Kaolin, 49.
 Kathode (or cathode), 2, 174-187.
 Keller, electric smelting of iron, steel, and ferro-alloys, 12, 129, 135, 137.
 electric steel furnaces, 92, 107, 135.
 ore-smelting furnace, 13, 14, 63, 64, 69, 70, 71, 78, 80, 111, 113.
 Kelvin, Lord, energy from the ether, 194.
 Kilogram calorie, 38-39.
 Kjellin, induction steel furnace, 12, 13, 30, 32, 64, 65, 72, 78, 80, 86,
 93-96, 97, 98, 99, 101, 105, 106, 107.
 Kortfors, Heroult steel furnace at, 69, 88.
 Krupp works, Essen, electric steel furnaces, 99, 106.
 Kryptol, 23, 149.

L

- Lake Superior Power Company, 111.
 Lampen, A., high temperature measurements, 50, 51, 55, 56, 83, 153.
 Lanyon Zinc Company, 157.
 La Praz, Heroult steel furnace, 45, 62, 69, 88.
 Lathe, F. E., steel from ore in electric furnaces, 133.
 Laval De, electric furnaces, 28, 29, 59, 72, 80, 135, 158, 159.
 Lead, 40, 161-170.
 Le Chatelier, high temperature measurements, 53, 82.
 Le Leux Keller and Co., electric smelting, 113.
 Lenher, V., H. Moissan, "The electric furnace," trans. by, 7.
 Lewes, F. B., "Acetylene," 155.
 Light electric, 1, 2.
 Lime, refractory material, 50-51, 55, 56, 57, 60, 61.
 Limestone, refractory material, 8, 61.
 Lincoln, P. M., resistivity of carbon, 77.
 Lindblad, electric induction furnace, 101.
 Linings of furnaces, 8, 12, 23, 45, 53, 49-60, 96, 112, 113, 132, (see also individual furnaces).
 Livet, France, Keller ore-smelting furnace at, 70, 113, 137.
 Lloyd, M. B., and Dupre, explosive gas from ferro-silicon, 141.
 Longmuir, P., analysis of ferro-alloys, 139.
 Lotka, A. J., nitrates from air, 173.
 Lucke, Prof. C. E., cost of water-power, 34.
 Lummer, temperature of arc, 53.

M

- Mabery, Prof. C. F., Cowles' furnace, 6.
 reduction of metals by carbon 9.
 Maehlen-Wilson Company, articles of fused quartz, 172.
 Magnesia (magnesite) refractory material, 8, 10, 51, 52, 55, 56, 57,
 88, 94, 105, 112, 113, 117, 129, 131.
 Magnesium, 184.
 Manganese, 12, 136-141.
 Materials of construction of furnaces, 49-60, (see also alumina, bauxite,
 carbon, carborundum, dolomite, fire-clay, lime, magnesia,
 silica, siloxicon).
 McGill University, electric crucible furnace at, 22.
 Measurements of furnace temperatures, 82, 83.
 Measuring instruments, electrical, 18.
 Melted metals as resistors, 20-30, 72, 93-106.
 Melting contents of furnaces, 26-28, 32, 66, 69.
