

WILLIAM CAMPBELL, Founder

MANSION CAMPBELL

An International Industry that Grew Up in Chatham

Output | 15,000 Fanning Mills
Every Year | 15,000 Incubators and Brooders

Sold all over Canada and the United States and every one bears the name "The Chatham."
When the Chatham Incubator was on the market for a year the output equalled that of the widest advertised and oldest manufacturer in the United States. There is something in the name, of course, but that was not the only reason of its extensive sale. It was reliable enough to sell on time. That was the guarantee the people wanted. Faith in the machine, faith in the poultry business, faith in the general public.
