

Make Sure —of Success

AFTER spending all the time and money necessary to properly prepare the soil, and after finishing the work of seeding, you cannot afford to take any chances on harvesting the crop.

The great element of safety and success in this work depends upon selecting the proper harvesting machine.

Taking everything into account, the McCormick binder will meet the most exacting requirements.

This is true not only because of the cutting and binding capacity of the machine, but also because of its easy draft, ease in handling and its remarkable strength and durability.

It is impossible in this small space to set forth the meritorious features of the McCormick binder in detail.

Someone in every community has a McCormick. Before you buy a binder ask this man about it.

Ask him if it has not given better service than any other binder he ever owned.

Ask him if it has not always been ready for work, and if it has not worked well in all kinds and conditions of grain.

It has been well said of the McCormick that "You see them wherever you go, and they go wherever you see them."

This is a well deserved compliment to the reliability of the McCormick.

The McCormick line of harvesting machines is complete and includes, besides grain and corn harvesting machines, binder twine, mowers, tedders, sweep rakes, side delivery rakes, hay loaders, stackers. Also a complete line of tillage implements and seeding machines, comprising disk drills, shoe drills, hoe drills, cultivators and seeders, smoothing, spring-tooth and disk harrows, land rollers and scuffers. Also gasoline engines, cream separators, hay presses, wagons, sleighs and manure spreaders.

The McCormick line is the O. K. line and is stenciled with the seal of excellence.

For detailed description of any or all of these machines, see illustrated catalogues.

Call on the local McCormick agent for information, or write nearest branch house for catalogue.

STRONG and DURABLE

Compact, all the parts accurately made, finely adjusted and working together smoothly; and at the same time, strong, well built, easy to keep in order and light running—these are the features you want to find in a cream separator before you buy one. And when you see a

U. S. CREAM SEPARATOR

you won't have to look any farther. It has them all. That's why it outwears all other makes.

Durability is what the "cheap" separators lack, yet it is most important. We have received letters from many users of the U. S. Separators who have run their machines every day for 10 years and more with entire satisfaction.

Our big, handsome, new catalogue shows plainly all about the construction and wonderful skimming records of the U. S. It will interest you. For free copy write us this way. "Send catalogue number A 110", addressing

VERMONT FARM MACHINE COMPANY, Bellows Falls, Vt.

Prompt deliveries of U. S. Separators from warehouses at Auburn, Me., Buffalo, N. Y., Toledo, O., Chicago, Ill., LaCrosse, Wis., Minneapolis, Minn., Sioux City, Ia., Kansas City, Mo., Omaha, Neb., San Francisco, Cal., Portland, Ore., Sherbrooke and Montreal, Que., Hamilton, Ont., Winnipeg, Man. and Calgary, Alta.

Turn On The Rain When You Need It

IF YOU are a farmer you have seen your crops suffer for lack of moisture.

Did it ever occur to you when the drought came what a fine thing it would be to have a stream of water running through your field, which could be turned onto the thirsty ground.

If this thought never did occur to you just stop and think a minute—water always there—no danger from dry spells—no possibility of crop failure, for when you have good land, good seed and warm weather all you need to make a perfect crop is moisture—we furnish the moisture and there is absolutely no failure in the supply.

You believe in irrigation—you can't help it, for it marks the difference between absolutely sure crops and uncertainty.

Certainty is always to be preferred—therefore you believe in irrigation.

That being the case it only remains for you to choose the best spot under irrigation in which to invest your money and make your home.

All things considered, Sunny Southern Alberta is the best district in the world for the man seeking sure returns.

In the first place, the Canadian irrigation laws are the best on earth—in the history of

Canada there has never been a suit over water rights—the Government stands behind the farmer and settles disputes free of cost in case there should be any, but there are none because the Government sees to it that no irrigation ditches are built unless there is ample water to supply them.

To the farmer who has had endless water litigation this means much.

The land is good in Alberta—there is no better and the constant deposit of silt and other suspended matter continually improves it.

Southern Alberta is without question or doubt the finest live stock country on earth—the summers are grand and the winters are mild as those of the Central States.

Almost any crop can be raised in Southern Alberta. It is the coming wheat, alfalfa and sugar beet country of the continent, and the markets for beef, mutton, pork, grains and all other farm products are better than those of the western states.

If you want to verify what we say by seeing Sunny Southern Alberta, we will be glad to make the trip cheap and easy for you—send your name and address and learn how to get here the best way and how to get the best land on earth in the LAST GREAT WEST at prices so low that they are hardly to be considered. Address,

THE CANADIAN PACIFIC IRRIGATION COLONIZATION CO.,
109 5TH AVE. WEST, CALGARY, ALBERTA, CANADA.

We Do Not Say "Best"

BECAUSE

Mostly every maker does, but

We do say that a cream separator should be built with the bowl supported at both ends, giving perfect balance.

Its driving gear should be on the spur or square principle, which is the kind that should be used on a fast-running machine.

A simple one-piece skimmer, giving perfect separation of the butter-fat from the milk, at the same time easy to clean.

A perfect ball race that runs easy and will not wear out.

A strong solid frame to set the parts in, giving steadiness, and therefore durability.

Now, the MAGNET has all these good points in its construction, and is the only Cream Separator that has, and we make it.

Investigate these points of superiority in the MAGNET.

You want a good separator, and this is the way to get it.
